Who was it that turned Geo. Fallstead down for a "chronic office holder?" The bosses.

Who nominated Gagnon for "the Lord knows what" term, regardless of party precedent and to the exclusion of "Dick" James, a "young aspirant" and a capable young man? The bosses.

Hundreds of democrats, who consider their own interests paramount to that of party, will cast their vote for the republican nominees. They believe they will serve their party better by putting it through a course of purification, thereby doing a double duty.

If George Fallstead is satisfied with the lemon handed to him by the democratic machine bosses, he is not the man he has always been reported to be. He should remember that he has friends who feel the humiliation as much as he does, and who will refuse to be satisfied with the arrangements of the bosses.

Judge Gagnon, when he made the campaign for county judge four years ago, was continually harping against the third term. Now he is seeking that which he condemned himself, four years ago. If he is honest in argument, then he ought to vote against himself for re-election as he is now running for "the Lord knows what" term.

Talk about your old-fashioned, ring-ridden county conventions. If the recent primary election didn't show "bossism" in the democratic lines, we miss our guess. It was so much so that even the good democrats have refused to be a party to it. The bosses rode Gagnon clear over James, a "young aspirant," as they also did Morris over Fallstead.

The echo of the democratic machine, while diligently doing the bidding of the bosses, never lost sight of a personal interest in the county board. He was heard to remark at a time when the whole democratic ticket was elected and the board of supervisors showed a republican gain—"this means defeat to me." Who will he choose this year, Hutchens democrat or Hinton republican?

Those republicans who voted against Judge Wilhite four years ago on account of the third term issue, which they declared they could never and would never endorse, can now apply their objections to Judge Gagnon. He is not only a fifth term-er but didn't want the office. He didn't even file until after James was allowed to file and was given to understand that Gagnon would "stay off." But the bosses and their machine were afraid of James, so they forced Gagnon on the ticket.

Why We Are Stronger.

The old Greeks and Romans were great admirers of health and strength; their pictures and statuary made the muscles of the men stand out like cords.

As a matter of fact we have athletes and strong men—men fed on fine strength making food such as Quaker Oats—that would win in any contest with the old Roman or Greek champions.

It's a matter of food. The finest food for making strength of bone, muscle and nerve is fine oatmeal. Quaker Oats is the best because it is pure, no husks or stems or black specks. Farmers' wives are finding that by feeding the farm hands plentifully on Quaker Oats they get the best results in work and economy. If you are convenient to the store, buy the regular size packages; if not near the store buy the large size family package.

FROM GALVESTON.

Interesting Bits of Information Concerning Industrious Galveston.

In a personal letter from J. S. Mullen, a former Richardson county boy, who is now located in Galveston, the following interesting information of that great city was conveyed:

"* * * * * Galveston had a little storm in July but it did no great damage outside of the fishing piers, and bath houses, which were on the outside of the sea wall. These buildings were entirely destroyed, but are being rebuilt on a larger and grander scale than ever.

We have now under construction what is termed the "Causeway," which will be about 300 feet wide and about eighteen feet above the sea level, connecting the island with the main land, which means a bridge over three miles long. This structure is the third big undertaking since our storm in 1900. First the sea wall which was an expense of \$2,000,000; second, the raising of the city on a level with the sea wall to within a few blocks of the business houses, being a gradual slope from the sea wall down—cost two million.

The Causeway, which was started less than thirty days ago, shows signs of activity. This Causeway is to be built in two years, requiring an army of men working day and night. This structure will be lighted by electricity by night, which enables them in losing no time in completing same. This undertaking will cost about another two million dollars and by the time it is completed we will have the electric car line completed between Galveston and Houston, which is a distance of fifty miles. By this you may know we are not going backwards on account of the storm in 1900—* * * * *
