

THE COMERS AND GOERS

HAPPENINGS OF INTEREST TO YOU AND ME.

What Your Friends and Their Friends Have Been Doing the Past Week.

—Eat Sowler's Candy.
Fishing was good Monday.
—Dr. Wilson, Wahl's building.
Falls City Chautauqua, Aug. 6 to 14.
Mrs. Ellen King is visiting in Omata.
—If it's shoes you want, call at the Home Shoe store. 14-1t
B. P. Berry of St. Joe was in town Tuesday.
—The Candy Kitchen for brick tea cream.
Have you purchased your Chautauqua ticket?
Mrs. L. C. Maust has returned from her trip east.
J. B. Whipple, Poland China hog sale, November 19, 1910.
Lafe Dowell was down from Salem Tuesday.
Farmers are busy threshing. The yields are good.
Mr. and Mrs. Burk of Dawson were in town Monday.
Agents Not Wanted—is the latest from the county.
Frank Sneathen of Humboldt was in town Tuesday.
The Maldox girls of Auburn are visiting in this city.
John Crook and wife are spending this week in Chicago.
Miss Bessie Bohrer went to Lincoln to visit for a few days.
New Home Scene post cards for a penny at the Tribune.
Clem Bohrer is erecting a school building at Osmond, Neb.
Henry C. Smith offers peaches at 50c per bushel at his farm.
The best Chautauqua ever held in Richardson county. Come!
The State Fair will hold its annual meet at Lincoln Sept. 5-6.
Buy Home Scene post cards. Only a penny at the Tribune.
The water committee is striking water on the Slocum property.
Don't fail to hear the Swiss Orchestra at the Chautauqua, Aug. 8, 9.
Mrs. M. B. Sharp has gone to Omaha to visit with her daughter.
The Maupin band will play at the chautauqua, August 8, 9, 10, 11, 12.
Arthur Camblin was down from Stella to visit his mother Tuesday.
Neal Thornton has gone to Oklahoma to look after business interests.
Mr. Byrne of the Byrne Lumber Co. of Dawson was in the city Tuesday.
The Tribune will make your post cards for you from your own photos.
Gov. Robt. B. Glen of North Carolina will speak at the Chautauqua, Aug. 8.
Miss Beulah Frey is entertaining her sister, Mrs. Metz of Oklahoma this week.
Mrs. Lyman has moved to Republican City, where she will open a millinery store.
Miss Beulah Zoeller of Preston is in the city visiting her friend, Miss Ruth Lichty.
A number of Falls City fans went to Nebraska City in autos, Monday, to see the ball game.
E. S. Towle has let the contract for the steel ceiling of the Derby Saloon to T. D. Tatroe.
Ward Mower's trial is on in Kansas City. His friends here are naturally interested in the result.
Mr. Putnam has let the contract for the plumbing of his new block house to F. D. Tatroe.
The Zimmerman Music Company is disposing of quite a number of their excellent instruments.
Tom O'Marr and Luther Stewart got into a saloon row Saturday night. O'Marr got the worst of it.
Henry C. Smith has some fine fruit on his farm. The peach crop is about ready to market.
Hiawatha is not happy over her league losses. Others can sympathize with her in her distress.
Mrs. Birdie Maupin will be on the Chautauqua program again this year. You will not want to miss her children's hour.
It will soon be time for the street paving gang to begin to stir, or they will not get started before the frost gets in its work.

Rev. B. F. Williams will not likely remain in Falls City beyond the time of his present arrangement with the Baptist church. This expires at the end of the month. He has received two calls from churches in the east. One offered him \$2,000.
The man who would rather be "bossed" than to get up and hustle on his own invitation, ought to be tied up as a relic and curiosity. He is a specimen of the age-long covered by the mind of the past.
At the organ recital in the Presbyterian church tonight, (Thursday) Mr. Stanley will give some new and rather unique renderings. You will want to hear him.
Mrs. Ransom and son, Raleigh, intend going to Stella Saturday to visit her son, Floyd. From there they will go to Shubert to visit her daughter, Mrs. Walter Vanlaningham and family.
The postoffice department at Washington has not yet heard from the man in Falls City, who was going to donate a site for the new Federal building.
—We are buying apples, peaches, and plums at the warehouse near the mill. Let us know what you have to offer. Call phone 396 or 318a.—Heck & Wamsley.
The farmers on the Nemaha bottoms are getting their small grain harvested without loss, this year, which is somewhat unusual for them.
The party of young people, who went to Sabetha Sunday and were caught in the storm in the afternoon, had a really strenuous time of it.
—Choice styles of linen and cotton skirts at \$1, \$1.50, \$2 and up to \$5 at Lyford's.

Big Meet.
The people of the Christian church are making an heroic effort to land the next annual convention of the Nebraska Christian Missionary Society, in July, 1911. At the last convention there were 2,300 delegates present. The brethren of the Christian church and the Commercial club of Falls City have sent a cordial invitation to the convention and hope they may succeed in having Falls City chosen as the meeting place next year.

Married in Omaha.
Miss Emma Wallace and Wm. F. Fuller, both of Omaha were quietly married at the bride's home, June 29. The bride has many friends in this city who hasten to extend congratulations. They are at home to their friends.

24 HOUR SALESMEN
YOUR best salesman cannot work more than 12 hours a day.
An advertisement of your goods in this paper works while you sleep and wake—24 hours a day.
It works in many households at the same time.
It tells better than the most fluent \$... a week salesman.
No one slams the door in its face.
It is successful. It sells goods.
About the cost? Far less than the \$... salesman and does lots more work at Lyford's.

MAKING PROFIT IN POULTRY
Vast Difference in Laying Capacity of Different Strains of the Same Breed.
Seven years ago I paid \$10 for 100 hatching eggs, which came from a noted breeder who kept single comb white Leghorns exclusively, writes a correspondent of the Agriculturist. I secured the first egg from the pullets when they were four months and 19 days old. From that time they laid continuously up to August 1 of the next year, when they began to molt. I have raised chickens all my life, and have had almost every breed, but these are the best, because they are a laying strain.
People have the idea that all chicks will lay. They do not realize there is a vast difference in the laying capacity of the different strains of even the same breed, so much is said about feeding for eggs. Hens bred to lay do not have to be fed to lay; I mean coddled. I hatch early, usually starting the incubator in February. My squab broilers when eight weeks old weigh from 12 to 16 ounces each. This is very rapid growth for pure Leghorns. All the pullets are kept for laying purposes. Both males and females are kept together until the first two weeks commencing Johnny cake mixed with buttermilk and cut green bone twice a week.
After the cockerels are disposed of the pullets are not forced. Last year in my home market, Albany, the squab broilers brought one dollar a pair up to July 4. After that I received 75 and 80 cents a pair for regular size broilers, three pounds to the pair. By the middle of September my early pullets are all laying, and during the winter they have practically all laid, with eggs at 45 and 50 cents a dozen. Their feed is oats mixed with chaff from the barn floor in the morning, an occasional sheaf of wheat to pick at, and at noon corn on the cob, which they work on until night. Plenty of fresh water and grit they have at all times. They have warm sleeping quarters and a large scratching shed and are never allowed out in the snow or wet, but are kept free from dampness by use of plenty of clean, dry litter and are always in clean quarters.

MAKING NEST EGGS OF CLAY
Mold Invented by Which Poultry Fancier Can Make Artificial Aids to Laying.
Farmers and chicken fanciers need no longer depend on the china egg market for their nest eggs. An Arkansas man has invented a mold by which any man may turn out as many of these artificial aids to laying as he thinks his hens will need. The mold consists of a receptacle made in two parts, each part of which is hollowed out in the shape of half an egg. One section has fingers jutting from it and the other section fits inside these fingers and over an inner rim of the

For Making Nest Eggs!
The material used to make the eggs—it may be plaster of paris or clay—is placed in the two sections and the mold is fitted together. The mold is then placed in an oven and baked until the contents have hardened, when it is taken out and opened and a perfectly formed artificial egg falls out. To complete the resemblance, a coat of white enamel should be given the oval and any hen may be defied to tell it from the real article.

Breaking Broody Hen.
If a hen becomes broody and you do not want her to set, confine her as soon as possible in a coop or narrow run, feed grain and she will begin to lay again within a few days. If she is allowed to set for several days she will lose flesh and vitality and will not resume laying for several weeks. Either set the broody hen or start her to laying.

Selecting Poultry Plant.
Select for the poultry plant a location, if available, on land naturally well drained, sloping gently toward the south or southeast, and sheltered, if possible, by a belt of trees or an orchard from the harsh winds and storms of winter.

Philosopher on Riches.
No good man ever grew rich all at once.—Publius Syrus.

POULTRY
POULTRY NOTES.
Poultry keeping is a decidedly healthful occupation.
The early spring pullets make the fall and winter layers.
Select medium-sized, well-formed eggs from healthy hens for setting.
Allow one male of the large breeds to 12 hens, and one to 15 hens of the smaller breeds.
The Bourbon Reds are said to be quiet and easily handled, non-roving in habit and yet very hardy.
No one can succeed well with poultry who permits them to live year after year in filthy places.
Keep the chicks absolutely free from insects to grow them to maturity as quickly as possible.
Keep the pigeons' flying clear of bolts as the birds are apt to injure themselves by flying against them.
For the man in the business of egg production, with fowls of the Leghorn type, incubators and brooders are a necessity.
Unless one has the time and patience to attend to the incubator properly, he had better let the hen hatch his chickens.
Buckwheat is a good food, similar in composition to corn. It is best used in connection with some more nitrogenous food.
One can learn many things from books but one of the things one cannot learn all about is pigeon raising. That takes experience.
Duck eggs should be set under hens if early broods are wanted. Hens make better mothers, at least, for the early broods, than ducks.
Have the laying and setting rooms well cleaned, the partitions white-washed and the nest boxes dusted with tobacco dust to check the lice.
There is not as profitable an adjunct to any farm, be it large or small, or even the tenant, for the amount invested, as a nice lot of poultry.

TEST EGGS FOR FERTILITY
Simple Arrangement by Which Task May Be Accomplished in Short Space of Time.
In starting the incubator it is essential that the eggs be tested for fertility, which may easily be accomplished with the simple and quickly made tester illustrated herewith. A strip of cardboard is bent into a circle and sewed together so it will set over the chimney or globe on an ordinary lamp; into the side of this cylinder

Egg Tester.
cut a hole about two inches in diameter and make a second tube to fit same, of cardboard, attach this by sewing onto the larger one and the tester is complete. It is placed over the lamp and the intensity of the light shows through the smaller cylinder on the side; by placing the egg up against same it can be tested in a moment's time, much time being saved by having both hands free to handle the eggs.

LAYERS ARE MONEY MAKERS
Careful Selection of Flock, Eliminating Drones, is Sure to Increase Productiveness.
(By W. E. VAPLON, COLORADO AGRICULTURAL COLLEGE.)
Do not blame your pullets next winter when they are not laying; you should have been busy on the problem during the present winter. You should know which hens are furnishing the eggs from which these pullets will be hatched; the chances on the average farm are that the eggs from the poorer layers and slower maturing pullets are being used for this purpose, and that the hens that have been laying all winter are being used to hatch these eggs. Culling, selection, elimination, kept constantly in mind, and continually practiced, will mean healthier fowls, livable chicks, earlier pullets and eggs when they are most wanted.
Do not set eggs from the whole flock, but dispose of all males not used in this breeding pen, and from the remainder of the flock gradually eliminate the drones. It is surprising how large a proportion of the average flock is useless, or worse than useless, for these non-producers are in the way of the workers and are preventing them from doing their best. If you cannot make up such a breeding pen this spring, try this for next season. Next fall mark or band the first thirty pullets to begin laying; also the yearling hens that are doing well this season. During the early winter carefully note their performance, and from these banded hens and pullets make up your next year's breeding pen. You will be surprised at the increased vigor and productiveness of your flock.

Care of Droppings.
During the summer when not enough coal, dry loam is a good material for sprinkling the droppings. It will keep down odors and absorbs fertilizing elements. Never use wood ashes, as they cause more odor and destroy the fertilizing value of the droppings.

Five Minutes Late!

THE DESTINY OF AN EMPIRE HAS OFTEN HINGED ON INACCURATE TIME

A Dependable Watch

Such as we handle

is a good investment, besides having a tendency to quiet the nerves and promote confidence. A "good" watch is not necessarily an expensive watch. We can fit you out at a very moderate cost.
