

NEBRASKA.

Some Facts All Nebraskans Ought to Scatter Broadcast.

Very few people have any idea of the productivity of Nebraska. They have some comprehension of the gold output of the nation and of the several states. They think of the copper output as something wonderful. They think of the tobacco crop as one of the nation's great resources. Yet they utterly fail to realize that Nebraska produces in grains and grasses more wealth than the gold mines, the copper mines or the tobacco plantation.

Wonderful stories have been told of the Alaskan mines, and thousands have been lured to the mountains of the west and the frozen wastes of Alaska by the glitter of the yellow metal. But in 1909 the corn crop of Nebraska was worth \$5,000,000 more than all the gold mined during the same year in the entire United States, including Alaska and the Philippines.

We have heard about sugar and its protection until we are apt to imagine that the sugar crop of the United States is something magnificent in its proportions. But the 1909 wheat crop in Nebraska was worth \$5,700,000 more than the entire sugar production of the United States during the same year.

Texas is a great state, and it takes the lead in cotton production. We have heard a great deal about "King Cotton," but the 1909 cotton crop in Nebraska was worth \$4,500,000 more than the 1909 cotton crop of Texas.

Kentucky is the greatest tobacco producing state in the Union, and we are apt to believe it means more to Kentucky than any grain crop means to Nebraska. But the 1909 egg crop in Nebraska was worth \$500,000 more than the 1909 crop of Kentucky tobacco.

Rockefeller acquired wealth from petroleum, and we are apt to imagine that the crude petroleum product is something far surpassing the entire product of Nebraska's field and stock yards. Not so! In 1909 the Nebraska live stock product was worth \$9,000,000 more than the total crude petroleum product of the United States for the same year.

Illinois is one of the great coal producing states of the Union, and coal is one of the boasted products of the Sucker state. But Nebraska wild and tame hay in 1909 was worth \$14,000,000 more than the 1909 output of Illinois coal.

Nebraska butter in 1909 was worth \$3,000,000 more than the total gold and silver output of Colorado's mines for the same year.

Nebraska's 1909 corn crop was worth \$23,000,000 more than the Nation's tobacco crop for the same year.

Nebraska live stock, cereals, grasses, butter, eggs, fruit and poultry in 1909 was worth as much as the Nation's output of bituminous coal, save the output of Illinois, mentioned above.

Nevada is the great mining state, but her 1909 output of gold and silver was worth \$1,000,000 less than Nebraska's 1909 crop of alfalfa.

We hear much of the iron and steel

industry, but Nebraska beef and pork in 1909 was worth \$45,000,000 more than the product of iron ore of the nation, valued at the mines.

Isn't it a wonderful state? And isn't it our duty to spread a knowledge of it abroad to the land hungry and industrious peoples of the earth.

One of the youngest, Nebraska is also one of the greatest states in the Union. Let us all work together for the upbuilding of Nebraska, and one way to accomplish the best results is to spread abroad the real facts about this beloved state of ours.

Notice of Referee's Sale.

Notice is hereby given, that by virtue of an order of sale, issued out of the district court, in and for Richardson County, Nebraska, on the 3d day of August, 1910, in a suit for partition wherein William Fischer is plaintiff, and Charles Fischer, Geo. Fischer, Emily Herschberger, Louis Fischer, Annie Smith, Lizzie Peabody, Fred Fischer, Rosina Walruff, Myrtle Fischer, Alice Fischer, Fredricke C. Fischer, Mary Fischer, John Herschberger, George Smith, George Peabody, Julius Walruff, Annie Fischer, Wm. Fischer, Lydia Fischer, Albert Fischer, Louisa Fischer, Frieda Fischer, and Walter Fischer, are defendants, directed to me as referee, in said suit for partition, I will as such referee, on the 5th day of September, 1910, at one o'clock p. m., at the west front door of the courthouse in Falls City, Richardson County, Nebraska, sell for cash the following described premises to-wit: Lots Nos. nineteen (19), twenty (20), twenty-one (21), twenty-two (22), twenty-three (23), and twenty-four (24) in Block No. (93) ninety-three, all of said lots situated in the city of Falls City, in said county and state, according to the official plat and survey of said city.

Terms of sale cash.

Dated at Falls City, Nebraska, this 3d day of August, 1910.

LEGAL NOTICE.

Notice of Settlement and For an Order of Distribution.

In the County Court of Richardson County, Nebraska, in the matter of the estate of William H. Sailors, deceased. To the creditors, heirs, legatees and all others interested in said estate. Take notice that Mary E. Sailors has filed in said court a report of her doings as administratrix of said estate for her final settlement thereof, also filed a petition for an order of distribution of the residue of said estate in her hands.

It is ordered by the court that the same be heard in the County Court room in said county on the 22d day of August, 1910, at nine o'clock a. m., when and where all parties may appear and oppose the same. Ordered further, that upon the approval of said report a decree of distribution of said residue will be made to the parties entitled thereto.

By order of the court dated August 1st, 1910.

JOHN GAGNON, Judge.

CONQUERING THE WASTE SAND

European Countries Solving Great Problem by Planting Vast Areas With Trees.

Europe is conquering the waste land problem by planting trees. Every year thousands of acres of land are being reclaimed in this way by the leading countries and put in a condition preparatory to a profitable timber harvest in the years to come.

Not only many previously forested areas which have been cut over have been planted up, but a number of the countries are also devoting their energies to establishing a forest cover on dunes and other waste lands, and, in fact, on all land which is more valuable for producing timber than for other purposes.

France has been one of the foremost European countries in reforestation, especially in the mountains, where planting has been a powerful factor in controlling torrents and regulating stream flow. The state each year buys uncultivated lands, in the mountain regions, and up to January, 1907, it had acquired 503,000 acres in this way. Communes, associations and private individuals are also assisted in reforestation work by grants of money and by supplies of plants and seeds. Altogether 249,000 acres have been planted through this public assistance. Complete exemption from taxation for a long period of years is granted in the case of plantations made on the tops of slopes of mountains. A reduction of three-fourths for all land planted or sown, whatever its situation, is also made.

WILLING TO CALL IT OFF

Lew Dockstrader Tells Story to Illustrate His Theory That We're All Superstitious.

"We're all superstitious," says Lew Dockstrader. "Ever hear the story of the two negroes who got into an argument? One says to the other: 'I'll bet yo' a dollah that I got the nerve to sit on a tombstone in de graveyard while the clock strikes midnight.' The bet was made, but the other man had to go along to see whether or not the conditions were carried out. On the way to the cemetery the second man fell and broke his wooden leg. But he was so anxious to win that dollah that he took the leg off and hobbled along to the cemetery, one hand on the other negro's shoulder. They seated themselves on a prostrate tombstone. 'Do I win that dollah, or do I not?' asked the man who made the proposition, triumphantly. Just then the clock in the church steeple began to strike. From behind a bush near by a sheeted figure advanced upon the negroes. 'Whahfoah are you all distubbin' mah rest?' it asked. The negro that bet he wasn't afraid started for home on the keen jump. The only way out was through a narrow lane, bounded on either side by tall hedges. About half way down the lane the running negro heard a pat-pat-pat just behind him. He could feel the hot breath of his pursuer on the back of his neck. A hand reached out and touched him on the coat, and he just doubled his speed. 'Oh, mah goodness, niggah!' said the voice of the one-legged man, 'git outen mah road and yo' can keep yo' ole dollah!'"

The Wise Tailor.

"The late Goldwin Smith," said a magazine editor, "exuded good advice on all occasions.

"You know how barbers, in their desire to sell tonics and pomades, make coarse and insulting references to their patrons' baldness? Well, a Montreal barber once criticised the condition of Prof. Smith's hair in that way, saying:

"'Hopelessly bad as your scalp looks, sir, my Scalpene-Dandurffia will fix it up.'

"The aged philosopher flushed and retorted:

"'You are very foolish to point out your patrons' physical defects. That saddens and displeases them. It doesn't make them buy. It drives them away, and they will never return. You would be wiser, my poor fellow, to imitate a successful downtown tailor. This man says to every patron as he takes his measure—he says it to a fat and lean, short and tall, alike:

"'It's an extraordinary thing—of course you already know it, sir—but you have exactly the same measurements as the Apollo Belvidere.'"

Eye Shows Disease.

According to Dr. W. Anderschon, a Norwegian scientist, all diseases and injuries are registered on the iris, either by color spots or lines, each organ of the body being connected up with the iris and having its representative place there. The right eye is the indicator for the right part of the body and the left eye the indicator for the left half. The new system of diagnosis is said to have been discovered by Professor Peozely of Poland, who, in his boyhood, caught an owl and the bird's right leg was broken. The boy noticed a black stripe in its right eye. He kept the bird and found that when the fracture was well the black line disappeared.

Race Growing Sturdier.

Dr. Sargent of Harvard finds that the present day undergraduate is an inch taller and four or five pounds heavier than the undergraduate of 30 years ago, and he lays it to athletics. We doubt that. Why not lay it to the generally believed fact that their mothers are taller and more healthy than were their grandmothers?

Grand Opening

The New Zimmerman Music House has thrown its doors wide open, and in the fullest sense are now ready to serve the public in their line.

A full line of all kinds of Musical Instruments will be carried, together with extensive assortment of Sheet Music and musical supplies.

TWO CARLOADS High Grade Pianos just received and now ready for inspection.

TOBEY FOR CONGRESS

I stand for the declaration of the last national republican platform and the pledge of President Taft, that the tariff should be revised downward.

I believe that pledge should be kept and that there should especially be a revision downward on trust-controlled articles and on those things which are so rapidly increasing the cost of living.

I am for a permanent Tariff Commission with real powers to investigate schedules and abate abuses pending congressional action.

I am for giving the interstate commerce commission adequate powers to regulate and control all common carriers.

I am against Cannon and Cannonism.

I am for county option in Nebraska and for some measure in Congress that will prevent the issuance of federal licenses or tax stamps in dry territory.

I have had eight years' experience in Washington, am familiar with the work of all the departments, and will be able from the first to look after the needs of my district, whether it be for the farmers, the town men, or the old soldiers.

I am a candidate for the republican nomination for congress in the First District. If you approve of the above declarations I would like to have your support, and I would like to hear from you.

GEO. E. TOBEY, Lincoln, Nebr.

140 No. 12th Street.
