only in small quantities so that they do not have any effect upon the quality of the paint. There are a great many of these but it seems unnecessary to consider them all. The compounds of chromium, chrome red, chrome green, chrome yellow are very intense colors and are much used. Most of the chrome green sold now is a compound of chrome yellow and prussian blue. Vermillion is the sulphide of mercury (quicksilver). It is brilliant and durable but apt to fade in sunlight. Carmine is fine clay (kaolin) colored with the dye obtained from the cochineal insect. Prussian blue is the Ferrocyanide of iron, Bremen blue is oxide of copper, Ultramarine is silicate of aluminum with sulphide of sodium.

Brunswick green is the oxychloride of copper. Scheele's green is the arsenite of copper. Paris green is the aceto arsenite. Chrome yellow is the chromate of lead. There are many more of these colors but these are the principal ones used in house painting. Their use is limited to color effects.

Almost all the greens fade and the yellows change a little but not much. The reds are fairly permanent in color except vermilion and red lead. The browns change but little and the grays still less. The shades of gray are pleasing, restful to the eyes, and unchanging. They are very popular.

**Market Letter.**  
Kansas City, Nov. 7, 1910—Reduced supplies of cattle the first days of last week resulted in stronger prices up to and including Wednesday, but the run turned out heavier than estimated every day after Tuesday, which injected discouragement into the market, and the close of the week found beef steers 15 to 30 lower, butcher cattle 10 to 15 lower, stockers and feeders weak to 25 lower. Packers' coolers are said to be empty, as killers have made no attempt to stock up during the season of heavy runs for the reason that plenty of fed beef is in sight for the winter. While this may be true, it puts the killers at a disadvantage, and indicates a more or less uneven market during the winter month. It calls for astute marketing, and the shipper who can manage to get in on the days of slim receipts will get a premium. The run is 17,000 head today, a big decrease from any recent Monday, and the market is strong. It will take the rest of this month to clean up the range offering, but each week sees them declining in quality, and a greater proportion of trash included. The fed cattle will have it their own way completely in a short time. At present, the sixty day steers are selling at \$5.75 to \$6.25, and the four month's steers at \$6.25 to \$6.75, and it takes long fed steers to bring \$7 or 7.50, with \$7.50 probably the limit. Cows sell at \$3.50 to \$5.00, canners \$2.85 to \$3.40, bulls \$3.50 to \$4.50, calves \$4.00 to \$8.25, and some fancy feeders above this. Hogs closed last week thirty cents lower than close of previous week, on an average. Diagnosed, the decline is more than that on light weights, and considerably less on heavy hogs, which two classes have been traveling toward each other during the past week. Liberal marketing of light hogs at eastern markets is the cause, and traders predict a still further narrowing of the price range. They also predict lower prices, and say that the market will not be settled till it has dropped below the eight dollar mark for the best. Run today is 4,000 head, market 5 to 10

lower on most sales, but the close was better, with the loss regained. Heavy hogs sold at \$8.00 to \$9.20 and lights \$8.35 to \$8.45.

J. A. RICKART,  
L. S. Correspondent.

### COMING TO FALLS CITY

CHIEF OF STAFF OF THE HOT SPRINGS DOCTORS

Saturday, November 19 At Union Hotel. Makes No Charge For Consultation Or Examination

The Chief of Staff of the Hot Springs Doctors is making his annual tour of the state, visiting the towns and cities, calling on their patients in each community, and consulting with new patients who are desirous of the great treatment that cures all chronic and nervous diseases of men and women. The phenomenal success of the Hot Springs treatment is due to the fact that it removes from the patient's system the cause of disease.

The highest standard of quality is the only standard in the medicines used by the Hot Springs Doctors. These expensive medicines are especially prepared for each case, they are from the world's best laboratory, guaranteed by the pure food laws, eliminating all possibility of anyone taking into their system any poisonous drugs. A cure is sure and permanent as a result of taking the world famous Hot Springs home treatment.

Chronic and nervous diseases like rheumatism, asthma, bronchitis, goiter, disease of the heart, blood and lung diseases, catarrh, gall stones, epilepsy, kidney, stomach and bladder troubles, and female diseases must yield to the treatment as given by these noted Specialists. In their Lincoln offices are thousands of letters from people who have been restored to health, in many instances these people could not have been cured were it not for the Hot Springs treatment.

The treatment that has cured these people and restored thousands of others to health is available to the people in this section, for it is this wonderful system that the Chief of Staff of the Hot Springs Doctors bring to us on Saturday, Nov. 19th at the Union Hotel.

They have hundreds of letters from cured and grateful patients, the following is a sample.

Dear Doctor—When I began taking your treatment I could hardly get to my office. I had had two operations and had tried several doctors, but got no relief. A friend of mine told me of you. My case was so bad I was afraid you would not take it. I am so glad I came to see you, as I am feeling so well now. I will heartily recommend you.—Mrs. C. B. Robertson, 2711 S. Ninth Street, Lincoln, Neb.

Dear Doctors—I had catarrh of the whole system for several years. My throat, stomach and bowels and kidneys bothered me all the time; was not at all times able to do a day's work. Your medicine has done me so much good that I would advise all suffering with catarrh and catarrhal conditions to take advantage of your treatment.—John M'Shane Gen'l Del., Omaha, Neb.

What may be a slight ailment now may in a short time be incurable. Opportunity knocks at every man's door once and if he does not answer goes away. Your opportunity is now. If you are suffering with any chronic disease and desire to be restored to health, vigor and happiness, don't fail to call Saturday, November 19th, at Union Hotel.

## WATCH TALK

THE HAPPIEST BOY IS THE ONE WHO GOT A WATCH FOR XMAS OR ON HIS BIRTHDAY

A Watch from Our Store Will Bring Happiness to Anyone, the Boy or Girl the Man or Woman. No other store offers you such a large assortment of fine watches to select from. Look 'em over.

**DAVIES & OWENS**

JEWELERS AND OPTICIANS FALLS CITY, NEBRASKA

The permanent offices of the Hot Springs Doctors are located at 14th and O Streets, Lincoln, Neb.

On Friday and Saturday evening, Nov. 11 and 12, there will be a tremendous display of curios and other material from China which have been gathered by the Drs. Tucker during their eight years residence in that country, and on their 1,000 miles journey on horse back. There are six large boxes of these goods which will be arranged for exhibition and a nominal sum of ten cents admission will be charged all adults, and on Saturday afternoon all school children will be admitted from two until five o'clock at five cents each. This will be an educational feature seldom possible to the people of any community in our country to attend.

### Notice to The Public.

My son, Samuel Nofsger, has left my home against my wishes and I hereby give notice that I will not be responsible for the payment of any debts contracted by him. All persons harboring or trusting him will do so at their own risk.—Mrs. Rosa Nofsger. 46-3t

Mrs. Sam Marts returned on last Thursday from a five weeks visit with her sons' families. She went first to Gardland, Kansas where she spent three weeks with the family of Bert Marts and then came in to Wyoming where she visited the families of Earl and Lee Marts. Earl Marts and family came home with her for a short visit. Her son Earl has been advanced to a better position on the Rock Island and will have a run of Lyman, Col., to which place his family will move in about a month.

Dr. W. H. Kerr's conditions has not improved. He is subject to severe sinking spells which always leave him weaker. He retains consciousness, and at all times wants his family about him. The "Nancy Co." of which C. H. Kerr and Mrs. Kenworthy has been close here so, that each night they have been able to come home for a few hours.

Mr. and Mrs. John Miner of Yankton, S. D. visited over Sunday with the family of their son, Dr. H. R. Miner, and made the acquaintance of the little grand son they had not yet seen.

## Get Ready for Xmas

Surprise your friends by sending them Photo Post Cards. We print them. The price will surprise you. Call or write for samples and prices.

Get your holiday stationery now. We can please you.

**The Tribune**

## Good Bread Good Flour

You cannot have one without the other. To bake good bread you must have good flour. When you use Gold Coin Flour you are sure to have good bread because it is the one best flour on the market.

Ask your grocer for it.

Distributors for Southeastern Nebraska

## TALKS ABOUT PAINT

DR. MORSMAN CONTINUES THE SUBJECT OF PIGMENTS

Iron, Quicksilver, Copper, Arsenic, Lead, Zinc and Minerals in Paint

To continue the subject of pigments.

Mineral White—This is calcium carbonate, or as usually called carbonate of lime, "Paris white," "Silver white" and "white ochre" are also carbonate of lime. They differ a little in preparation and purity. None of them are pure white when mixed with oil, but tend toward cream color. They have not the durability of lead or zinc but some very attractive shades can be made with these whites as a body paint.

What is known as "grey mineral" is a mineral white thoroughly ground with dry lamp black. For interior use these whites in combination do very well. I have seen an outside job that was 3 years old, where gray mineral was used, that was in excellent condition. I can show an inside job of this material at the store.

Now these whites are cheaper than lead but they will not cover as much surface so that the difference in cost, on the wall, is not as great as would at first appear. Lead is better but for cheap work these mineral paints do very well.

### Browns.

The browns used in house painting are mostly shades made by combination. Umber and sienna being the principal pigments used Umber is a Silicate of Manganese and Iron. Sienna is an earth paint and the Italian is much the best. Both of these are used natural or "raw" and also calcined or "burnt." This burning deepens and brightens the color. An imitation of Vandyke brown made of iron oxide and iron earths is an excellent brown.

Spanish brown or mineral brown is an oxide of iron of deep shade.

### Yellows.

Yellow ochre—This is an old time pigment that has been largely used and that gave good results. Of late it has been condemned as unfit material by painters and paint makers. I do not believe that condemnation is quite just. It is not discriminating,

The American ochre is absolutely worthless. It looks well and the color is good, but it has no value as a pigment. I think it is this American ochre that has brought discredit to the name. The French ochre is entirely different and while it is not as durable as lead it is reasonably trustworthy in combinations. Much has been said against it for priming but I do not think it hurts a priming coat to use part French ochre. It used to be used entirely for priming and with good results. The moss green that has been popular for roofs is made by combining French yellow ochre and prussian blue and it stands quite as well as any green will stand on a roof. Many mixed paints contain ochre although the manufacturers are loud in condemning it. The French ochre is a native compound of iron oxide which is deposited in the earth from water containing it. The German ochre is also of good quality, but is inferior to the French. Trade names are given to the various ochres that make it hard to distinguish what they are.

### Gray.

Gray mineral has already been spoken of. It is fairly reliable. The best grays are made with lamp black and white lead. Any shade can be obtained and they are very lasting. Lamp black is the most durable pigment there is. It will out last white lead.

### Reds.

Turkey red, Indian red, red oxide, venetian red and Prince's mineral are Argillaceous deposits, differing compounds of iron oxide. All are durable. Almost all the red barn paints are made of venetian red. Prince's mineral is a chocolate red, quite durable but not very popular on account of its dark color. Much, if not all our venetian red is artificial but it is quite as good as the native.

"Red lead called 'minium' is the red oxide of lead. It is orange not red. It is very durable but fades some. It is the best priming pigment for metal work. I have now considered all the important body pigments. That is those which are used to form a large portion of the paint and so might affect its quality for good or bad.

The other class that I have called color pigments are used in house painting for producing shades, and
