Grows Her Own Hy-Brid

Miss Myrtle Wood, who has a farm as well as her position as rural mail carrier to occupy her attention, has been able to give considerable attention to agricultural pursuits. This year she undertook—and has successfully carried out—the growing of her own hy-brid seed corn, which is really quite a difficult undertaking and one that requires a knowledge of fertilization methods and the proper time to do it. At the time it was ready, she went through the three-quarter acre of seed and topped the female rows, leaving the male rows and now with the maturing of the crop she has some very fine seed—an amount sufficient for all of her own planting next year.
