# **QUOTING BABSON AGAIN About Home Building**

Endorsement by Roger W. Babson, nationally known financial expert, has previously been given for Federal insured shares for savings and investments. In a current published statement, he now recommends home building at once.

> "As a primitive urge, building has descended through ages. As an industry, it is the oldest known next to agriculture. The man of today reads the real estate and builders' ads or roughly sketches his own ideas for a home. He is actuated by the same impulse as was his primitive ancestor in piling up flat stones and weaving branches to make crude walls and a roof. . . .

"If you contemplate building, start at once. Certainly, it will be many years before you can build as cheaply as you can today. Moreover, if inflation comes, there is nothing better in which to have your money than a little house without a mortgage.'

If financing is necessary, inquire about our monthly payment direct reduction home loan plan.
