Dogs Most Menacing

While returning home from a visit with her daughter, who lives a block away a Union lady came upon a group of boys in the alley near her home, who had five dogs. Two of the smaller dogs pitched at her, exciting the others and causing them to also join in the fray. Using the sweater she carried on her arm, to ward off the dogs, she asked the boys to call them off, which they refused to do. The dogs continued to snipe at her shoes, as well as tearing the sweater, while she edged away from them towards her home, calling for help in the meantime.

Complaint has been made and it will be asked that the menace be removed. A campaign should be inaugurated to rid the community of stray and mongrel dogs, on general principles, and we hope the village board will see to it that this is followed out, for they present a real hazard, especially at this time of the year, when dog days are so near at hand.
