### HEALTH UNIT SEEKS TO CONTROL DISEASE SOURCES

The division of sanitation, which forms an integral part of the Cass-Sarpy health unit, will direct its efforts toward prevention of the spread of communicable disease by indirect routes of transmission, according to members of the health unit staff. Indirect routes of transmission of disease germs include contaminated and unprotected water and milk supplies, improperly handled foods, unsterilized eating and drinking utensils, overcrowded living conditions and improper sewage disposal.

The duties of sanitary inspectors will be to inspect all establishments handling food, taverns, trailer camps, dairies, schools and other public gathering places, in the two counties served by the health unit.

It is explained that services of the health unit are for the public. Inspections and recommendations are made regarding private water supplies and sewage disposal systems, also upon request of the property owner. Headquarters are at Bellevue.

### SUNOWA CAMP FIRE NOTES

The meeting Tuesday, August 26 was called to order by our president, Helen Yardley. We had a short business meeting so we could hurry and finish our blocks of linoleum for our block printing. A few of the girls did not get finished so we will finish them next meeting. We closed by singing the Camp Fire Law.

Tuesday, Sept. 2 Meeting  
The meeting was called to order by our president, Helen Yardley. We talked about being in the King Korn Carnival; the meeting was adjourned and we finished our block printing. We closed by singing the Camp Fire Law.

## U. S. Production at War Tempo; Up 60 Per Cent

Employment at New High, with 54 Million on Payrolls—Steel Records Broken.

By ELMER C. WALZER  
United Press Financial Editor  
NEW YORK (UP)—Two years of the war in Europe have turned American industry from peace-time to war-time production, stepped up output by nearly 60 per cent and brought employment to a new record high, around 54,000,000 persons, a United Press survey reveals.

New records have been set in production of steel, airplanes, textiles, electricity, machine tools, cigarettes, and crude oil. Construction so far this year has totaled around \$4,500,000,000, according to Engineering News-Record figures, a higher total than for any full year in history.

Record payrolls have been reflected in a rush to buy consumer goods. Retail trade has risen to an all-time record high on a tonnage basis and is close to the record dollar volume made in 1929. Wholesale trade has risen with retail. More telephones than ever before are in use. More automobiles were bought than at any other time.

Steadily the cost of living has risen despite price ceilings, priorities and other expedients to check it. Experts assert this situation may get out of hand unless real checks, such as high axes and forced sale of government bonds are introduced.

**Steel Records Broken**  
Since the war began on Sept. 3, 1939, the steel mills of the United States have turned out 144,800,000 net tons of steel ingots. The year 1940 broke all records with output at 66,981,662 tons. In 1940, the whole world turned out 156,501,573 tons. So far in 1941, United States output has totaled about 54,500,000 net tons and it is estimated the production for the full year will reach 80,000,000 net tons.

In the 24 months since Sept. 3, 1939, heavy construction awards have reached the astronomical total of \$9,139,578,000. So far this year the total is around \$4,500,000,000, compared with \$3,987,243,000 for all of 1940.

Automobile production for the 1941 model season totaled 5,590,000 cars and trucks which is just about equal to the all-time record made in 1929.

Assets of national banks set a new record high at \$41,315,000,000 and deposits also made a new high—\$37,351,000,000. Money in circulation reached a record top just under \$10,000,000,000. At the beginning of the war the circulation figure was \$7,049,000,000 and at the time of U. S. entry into the world war the figure stood at \$4,066,000,000.

**Gold Stocks at 23 Million**  
Gold stock reached a record high just under \$23,000,000,000. This represents an increase of about \$6,000,000,000 in the 24 months duration of the war.

All commodities have risen an average around 20 per cent since the war began, while food prices have advanced as much as 48 per cent. Defense production was accelerating but the output of non-defense materials was threatened by government priorities.

### NETAB CAMP FIRE

Meeting was called to order last week by Vice President Donna Lou Richards. Secretary took roll call. We started covering our scrap books. Miss Wurga is our new guardian and Mrs. Bull assistant.

Mrs. Hattie Kirker is at Pacific Junction where she will spend a few days at the home of her daughter and family, Mr. and Mrs. J. C. Long and Nancy.

### DID YOU KNOW—

The quartermasters department is making its sacrifice of aluminum. Through use of enamel ware instead of aluminum in 20 thousand officers mess outfits about 200 thousand pounds of aluminum will be available for more urgent uses. Each outfit is to provide service for six officers.

polaroid goggles, made of plastic instead of glass, are being put into service. They are almost unbreakable, lighter in weight and take the glare out of bright sunshine, especially on snow or water.

four expert civilian bakers have been called to advise the quartermasters corps in its task of producing the 800 pounds of bread for daily consumption by the army.

ski troopers operating in Alaska are to be warmed with tiny new stoves weighing less than three pounds each. But they produce intense heat from either alcohol, gasoline or kerosene.

### NATURAL FREAK PRODUCES GHOSTLY FIDDLE SOUND

QUINCY, Cal. (UP)—The weird music, emanating from "Devil's Hole," a popular fishing spot on the Middle Fork of the Feather river, has been explained by Rudy Pulver, prospector and experienced mountaineer.

The deep tones of a bull fiddle reverberating through the Glen coat the fishing hole some of its popularity until Pulver investigated.

He found a fir pole lying at right angles across the trunk of a pine, swaying in the current. Pitch deposits between the two logs had dried to rosin and the friction produced the ghostlike music.

### TO CURTAIL SERVICE

LINCOLN, Sept. 4 (UP)—The state railway commission today authorized the Burlington Transportation company to discontinue operation of a round trip bus line between Lincoln and Nebraska City.

The discontinued bus left Lincoln in the morning, returning the same night. Two Burlington buses still operate on daily round trip schedules between the two cities.

### JOINS AIR CORPS

OMAHA, Sept. 5 (UP)—Nile Kinich, former Iowa University all-American footballer, has joined the naval air corps reserve and after nine months' training will become commissioned an ensign in the service.

### DRAGON FLIES ON WING

VANCOUVER, B. C. (UP)—Warning to pilots east: "Prepare for air raids." A swarm of dragon flies, about 10,000,000 of them according to some estimates, have passed over Vancouver, heading east.

### PLANE DESIGNER NOW CAN LAUGH AT PROFESSORS

YOUNGSTOWN, O. (UP)—Robert J. Woods, whose college professors told him he never would be an aeronautical engineer is the Youngstown designer of the Bell Airacuda and the Bell Airacobra.

Woods was orphaned at 17 and worked to send himself through high school and night school. When his family's estate was settled, he received \$1,200 and with this money attended the University of Michigan.

One day one of his professors detained him long enough to advise: "Woods, you'd better give up your aeronautical engineering and specialize in something else. You're just not cut out for it. You'll never make an aeronautical engineer. It's not in you."

After a series of positions with the Towle Aircraft Co., the Detroit Aviation Corp., Lockheed and Consolidated, Woods went with Bell as chief engineer, when he was 30.

The Airacuda and Airacobra are rated as two of the most vicious fighting planes produced by American concerns. The Airacobra has been diver at more than 600 miles an hour.

### NETAB CAMP FIRE

The meeting this week was called to order by our president, Jo Ann Bull. Margaret Farney, our secretary, read the minutes and called roll. Every member was present but one. Mary Jo Rehal, our treasurer, read her report and took up collection.

Book covers were discussed and hike for later on.

Miss Wurga and Mrs. Bull, guardian and sponsor were in charge of the meeting. Meeting closed by singing the Camp Fire song.

### Anchored to failure —by poor vision

The class "dullard" has often proved to be the most intelligent child in the class . . . when his defective vision was discovered and corrected. The stubborn, unsocial child has often turned out to be an active, likeable leader of his classmates . . . when his defective vision was discovered and corrected.

Poor vision is an unsuspected handicap that is anchoring many fine children, today, to failure. The only way of discovering its presence is by an eyesight examination.
