Survey Reveals 77 Employees In Armed Service

Western Division Supplies More Than Half of This Total With 44 Men

A recent survey to determine the number of former employees of Consumers Public Power District now wearing the uniform of one of Uncle Sam's armed services revealed a partial total of seventy-seven. This figure does not include former employees who have gone into war industrial work and later may have been drafted or have volunteered. If this information were available the total very likely would exceed 100 or approximately ten percent of Consumers total personnel.

Of the seventy-seven definite names learned in the survey, more than half, or forty-four came from Consumers Western division. Twenty-two of the Western division's contribution to the armed services came from Scottsbluff, seat of the division headquarters.

The service flag of the Lincoln district bears the second largest number of stars with a total of seven, however, the October selectees and volunteers will undoubtedly swell this total considerably.

From the information available the former employee with the longest tenure of service is Major Leslie Yager, from the Nebraska City district, who has been in uniform since November, 1940.

The list of armed service personnel, formerly employed by Consumers include. Plattsmouth office of the Consumers who have two enrolled in the army, William G Highfield and John S. Bishop.

EYES RIGHT

for the security of home and loved ones

UNCLE SAM'S put on his dungarees for the duration. What's more, he's fightin' mad and he's vowed to clean up this mess so the folks back home can still go to strawberry festivals—and Saturday night movies—in peace.

"Watch that tolerance!" "Mind that line!" "Keep your eyes peeled—and perfect!" "Make it fast!" "Make it good!" "Make it accurate!"

It's got to be right...or else! Every piece of equipment from crossed hair lines on a bomb sight to the fins of a giant aerial torpedo must line up—in the groove! Delicate micro-meters... fine precision instruments, the best of machine tools... are of little avail if the man behind the machine has faulty eyesight!

Clear, keen vision, unhampered by eye-strain, is just as important for the man behind the machine as the man behind the gun. Both are front line fighters. Better Vision means victory! Look to your eyes—today!
