VILLAGE GREEN SCRAP PILES TO BE MOVED AS SOON AS NEEDED

Large Open-Air Scrap Warehouses Sign of High Community Interest

and in dealers' yards before hauling it

That's a question which is on the tip of people's tongues from Maine to California. It's a question for which Uncle Sam has a multitude of very

positive answers. You might as well ask a man why he keeps his bankroll in the bank in-stead of stuffing it into his pants pocket. Those mountains of scrap metal on your village green are openair warehouses-your Government's scrap bank-account to be drawn on as needed. Washington has its eye on these scrap reserves just as the FBI has its eye on a lot of fifth columnists

whom they'll arrest in good time. Large stockpiles do not constitute a cause for alarm. The time to worry is when these towering peaks of rubber and metal begin to dwindle; when they level off from mountains to mole-

The next time you become impatient at the sight of a slow-moving heap of scrap, remember these facts: There are only 6,500 scrap dealers in the country to handle the hundreds of local scrap yard, who formerly could thousands of community scrap accu-mulations. A dealer's yard can actually handle only about one hundred preparation, now must do this job tons at a time. That's two freight cars full. If every dealer in the country— has just been handed from the people full. If every dealer in the country— has just been handed from the people to satisfy public clamor to move scrap of the United States, the largest offerquickly—suddenly decided to send his ing of household scrap in the history stock to the mills, the resulting rush of the world. He is not equipped to would tie up 18,000 freight cars. Now, the railroads are packing tremendous war loads on an endless round-the-clock,round-the-country basis. Freight cars have to be carefully allotted. If will be picked up—in time and in it comes to a question of hauling a sufficient quantities to arrive at the hundred tons of finished tanks or a mills and on the battlefronts when hundred tons of notential tanks in the hundred tons of potential tanks in the and where it is needed. Nowhere in form of scrap, well, the salvage waits America is there a victory stockpile

Before scrap can be shipped to the foundries it must go through a tedious process of sorting and preparation the front with the weapons they de-which requires a minimum of three serve in a fight to the death. It's up days per ton. As many as 75 varieties to you and your neighbors to build of metal scrap alone may be turned in America's hopes for victory by buildby junkies to the yards daily. These must be sorted into more than ten distinct piles. Separating the alloys from ordinary steel requires time, thought and much physical labor.

In neighborhood stockpiles to the sky.

Don't forget! It's much better to have our reserves in 35,000 piles—sorted and tallied—than in 30,000,000 attics, barns and plants.

"If we're really so hard up for scrap —then why the blazes do they let the stuff pile up for days on village greens or cut into specified lengths and sizes. Lighter pieces, such as automobile fenders, must be compressed into heavy bundles about two feet square. Heavier material is run through a shearing mill or seared by acetylene torches into small pieces. This is followed by the tedious job of baling and compressing to fit freight-car require-

The wonder is that despite the herculean tasks of sorting and prepara-tion, the dealer can often bundle his stock off to market in as little as two or three days. The mountain of "junk" in a dealer's yard on Thursday morning may have a familiar appearance. But it's not the same pile you saw on Monday. A yard without some scrap in process is like a grocery store with

empty shelves.
Even in ordinary times the speed of scrap to the mills is affected by the necessarily slow trip through the dealers' yards. Now, during war-time, lowever, two other factors intensify

the dealer's problems.
One is the problem which the farmer also knows something about— a lack of manpower. The head of your put three or four men to work at the difficult task of sorting, grading and of the world. He is not equipped to whisk these mountains of metal off the horizon overnight. The steel mills, by the same token, could not consume all this scrap overnight. That scrap America is there a victory stockpile too high or too great. Their size reflects the determination of people in the community to back the boys at
