painting for R. A. Kuehn the first of the week.

Remember those nice, balmy days and good roads that saved fuel, feed gas and rubber, all through February. Remember how we enjoyed them and yet we worried about the wheat—thought it would not come up on account of the dry condition of the soil. Those conditions applied almost exclusively to the month of February. While the rains that we complain of now are building up a reserve stock of moisture that will tide us over a considerable amount of dry weather through the grow-

ing season. We have seen corn planted on the 30th of May that yielded 60 bushels of good sound corn per acre. There are 30 days yet of corn planting season. The writer has resided in Nebraska 61 years and there has never been a year in which corn could not be planted in seasonable time to produce a crop if there was enough moisture.

Our boys must keep on fighting—we must keep on buying WAR BONDS until victory is won. Keep on BACKING THE ATTACK.
