It took a week of Father's wages

But it wasn't so extravagant as it seemed. Hats were bigger then—and also fewer. Mother's hand-made mauve velour was good for several seasons.

Today, Mother's hat bills may total as much or more than the price of that quaint old velour. But she gets many more hats for her money.

It's much the same with electric bills. If yours seem about the same as they did years ago, it's because you are enjoying so many more electric conveniences now. And you're getting far more electricity for your money than you ever did before—about twice as much today as you did 15 years ago.

Not only has the price of electricity come down steadily through the years, but it has stayed down while war sent other costs climbing.
