**ELECTRIC  
WATER SYSTEMS  
PAY FOR  
THEMSELVES**

With a time-saving, labor-saving electric water system, you have water where you need it, when you need it on your farm.

And you save money! The average system will pay for itself in a few months in labor costs alone, and at the same time, milk and butterfat production is increased substantially by having a constant supply of fresh, cool, running water.

An electric water system is probably the best investment a farmer can make. See your dealer now—there are some electric water systems available.
