Vast Variety of Surplus Items Offered for Sale

Steel scissors, push brooms, hunting knives and clay pigeons are some of the vast variety of surplus items now being sold throughout the country. Mr. John E. Kirchner, Acting Regional Director, Office of Surplus Property, Consumer Goods Division, Reconstruction Finance Corporation, announced today.

The scissors have four inch forged steel blades with rounded points and are gun-metal in finish. It is estimated that 782,966 pairs will find their way into sewing baskets.

The push brooms come in an assortment of types of fiber and approximately 185,000 are being offered to the trade.

Sportsmen will appreciate the 258,000 hunting knives and the 22 million clay pigeons included in the sale. The knives have six inch blades and are made of fine forged steel with leather handles and come complete with leather sheaths.

All but the clay pigeons are being sold to dealers through the Regional Offices maintained by Reconstruction Finance Corporation in 11 cities. Because of the excessive freight charges the pigeons are being offered only to dealers in the Midwestern and Eastern states, where the pigeons are now stored.

All the items had previously been offered to Government priority claimants and to veterans.

The 11 Reconstruction Finance Corporation Regional Offices are maintained in the following cities: Boston, New York, Philadelphia, Cincinnati, Chicago, Atlanta, Fort Worth, Kansas City, Denver, San Francisco, and Seattle.

Communications

"Southern Korea containing the capital is the hub of the communications system. It also has the principal cereal crops. On the other hand it is dependent on northern Korea for coal and electric power. Coal which is not obtainable from northern Korea must now be imported from Kyushu or shipped half way around the Peninsula from a small coal port on the eastern shore south of 38 degrees. The amount and duration of electrical supply is controlled by northern Korea without consultation with consumers south of the line. Neither section of the country is self-sufficient."
