CHICK STARTER IN NEW FORM ANNOUNCED!

CARGILL Introduces Improved Starter that's CRUMBLIZED* for Easy Eating

An important advance in the science of chick feeding has just been announced by Cargill. A new form of chick starter has been developed that provides chicks with easy-to-eat food bits sized just as nature intended. Not a mash... not a pellet... Cargill says "It's Crumblized!"

The new type Cargill starter incorporates the same famous formula that has made Cargill such a favorite with poultry raisers. The "Crumblized" process makes it better than ever. Not too fine, not too large, chicks can eat more in less time. There is no danger of clogged beak trouble, often caused by fine floury feeds. There is less

waste. Since each mouthful is a virtual blend of all food values, it helps assure a more nearly balanced diet for all chicks. Greedy chicks can't pick out the choice ingredients... so all the chicks benefit. Cargill Crumblized* Chick Starter is packed in colorful, cotton print sacks. Get a supply before your new chicks arrive.
