# The WASHINGTON MERRY-GO-ROUND

COMPACT DECODE

WASHINGTON-Franklin D. Prostant recently was comparing his father with the man who succeeded him in the White House. His general conclusion was that Harry Toa man certainly is not lacking in courage. "Father never stuck his nearly way Truman does,"-said young Franklin never wrote a letter to congress demandly. that they pass the FEPC. He was all for the FEPC and the anti-poll tax bill, but he left other people get out in front and carry the ball.

It was hard for friends to say whether young Franklin was paying tribute to Truman's courage or his father's sagacity.

One fact that many people don't realize is that Truman's position regarding racial injustice is strong partly because he has two conscientious southerners at the head of his justice department.

The Attorney General, Tom Clark, is from Texas, while the head of the criminal division Lamar Caudle, is from North Carolina.

Both have been vigorous in attempting to prevent racial injustice. When the race riots broke in Columbia, Tenn., for instance, Caudle, unable to get airplane transportation, drove all night in his car to reach the scene of trouble.

Again when Isaac Woodward, a megro veteran, was permanently blinded after an altercation with a South Carolina policeman, Caudle as chief of the justice department's criminal division-brought a criminal action against the policeman. Such a step by the federal government is almost unprecedented, and the fact that it was taken by a North Carolinan, with the support of an Attorney General from Texas, is significant. NOTE-Governor Ellis Arnall of Georgia and other southerners argue that the race problem can best be handled by southerners themselves.

won't play ball unless he gets his way. NOTE-Acheson's position on atomic energy control is much nearer Wallace's. No Money for Finland

Finland has been known to Americans as the little country which always paid its debts. Now, however, the U. S. is getting the repultation among Finns as a country which breaks its financial promises.

What happened is that one year ago Finland sent a trade delegation here to arrange for a \$70,000,000 loan from the export-import bank. The loan was promised, and on the basis of this promise, the Finns made purchases amounting to \$35,000,000 in the United States, with partial commitments for the remaining \$35,000,000.

Part of the deal was that Finland was to secure coal from this country which in turnwould help increase her newsprint production. Many American newspapers made arrangements to guy this extra newsprint.

However, something has now caused the state department to reverse itself. The export-import bank loan to Finland has been held up.

Actual, though unannounced reason for the reversal is the feat that Finland is now in the Soviet sphere of influence and it is feared that any financial help would indirectly aid Russia. However, there is considerable difference of opinion regarding this. Some government officials maintain that the Fnnish people are overwhelmingly pro-American and that a loan would more than offset what indirect aid might go to Russia,

So far, however, the Finns are still waiting. MERRY-GO-ROUND

The New York Times and other papers panned Walter Winchell for allegedly causing the stock market crash when he quoted General De Gaulle as believing there would be war between the United States and Russia. However, the same papers did not give Winchell a line of credit when DeGaulle in his spech last week confirmed Winchell up to the hilt. De Gaulle warned the French people of a clash between an "ambitious grouping of Slavs" and a "young America overflowing with resources." . Time magazine last week ent further than any other newspaper or newsmagazine by calling the President of the United States a liar. While a lot of us don't agree with the President, and a lot of us may consider him inept or even clumsy, neverthless he's our president, and we only degrade the position of our country when we call the head of the nation a liar.

EDSON'S WASHINGTON COLUMN

### BY PETER EDSON

## **NEA**\*Washington Correspondent

WASHINGTON, D. C .- (NEA)-The best guess on the number of atomic bombs the U.S. might be able to produce is contained in the new United Nations' scientific report on control of atomic energy It is a deduction based on three previously known facts which the experts put together for the first time.

The critical mass of rare Uranium-235 necessary to set up a chain reaction had been revealed in the Smyth report as "more than two and less than 100 kilograms." That's approximately four to 220 pounds, to make one bomb. It was also known that normal U-238 contained one part in 140, or seventenths of one per cent, U-235. And the Engineering and Mining Journal had estimated world uranium ore production at about 1000 tons a year. Putting these three facts together, the UN expert-

calculated that "the number of bombs which could be produced would be between 70 and 3500 per year." That's a wide margin, but it's the best

estimate so far.

The real reason U. S. coal mines are still in government hands have not been returned to the private owners, is that Northern and Southern operators can't agree on a formula for taking back their properties. Meetings of the operators are far stormier than sessions between the miners' union and the operators,

THE inauguration of Jesus T. Pinero as the first native-born governor of Puerto Rico will probably go down in history with the feast of Belshazzar as one of the biggest parties ever thrown.

About half the people on the island (pop. 2,000,000), came to San Juan for the inaugural day parade. The affair was supposed to be n great triumph for democracy and the common people of Puerto Rico, in that a native son was made governor.

But 5000 invitations went out to politicos for the reception at La Fortaleza, the governor's palace, that night, and after tinde the affair broke up into smaller parties. These parties are just now beginning to taper off, weeks after the inauguration.

HAROLD E. STASSEN'S 12-point Program for Progress, printed recently in Collier's magazine, was something less than a blg success.

It was a vast improvement over the official GOP statement of party principles drawn up by a congressional committee. But in drafting what was obviously intended to be a good middle-of-the-road program. Stassen ended up by straddling every fence in the country and actually made some elements sore.

The weekly newspaper "Labor," which circulates principally among the more conservative railway brotherhoods, called Stassen's labor plank "one of the most menacing threats yet made against the American labor movement." All Stassen called for was strict accountability of union funds, prohibition of the use of union funds for political purposes, a labor court to settle jurisdictional disputes, and a ban or jurisdictional strikes.

#### Army Reneges on Furloughs

When the army puts on its next enlistment drive it is going to have a hard time with certain G. I. 's who recall the promises made the last time they enlisted. One of those promises was that those who enlisted for a year would get thirty days' extra furlough in addition to their regular thirty-day furlough. It was on that basis that they enlisted for one year and one month.

Now, however, they find that the extra furlough is not going to be forthcoming. It's out the window.

War department circular 51 cancels the reenlistment furlough prmised to G. I.'s, and there is nothing the men who took the army at its word can do about it.

The war department explains that it was forced to cancel this furlough under the armed forces leave act passed by congress last summer. In other words, the army says, that after it promised the extra thirty days' leave, congress took it away. This was done when congress voted to put enlisted men-onthe same proportinate basis as officers regarding terminal leave, at which time it also voted that enlistment furlough leave counts against terminal leave.

How much the army did to guide congress on this legislation is not known. Usually the army can be quite potent on Capitol Hill. At any rate, a good many thousand enlisted men who signed up for a year are now sore as blazes and will think twice before signing up again

## Prima Donna Baruch

Elder statesman Bernie Baruch's fued with Henry Wallace isn't the only one he has been waging lately. He was careful to call a press conference and make sure that his Wallace row hit the headlines. But he hasn't wanted publicity regarding the backstage feud he has carried on with Undersecretary of State Dean Acheson over the same subject-the atomic bomb.

The spectacle of the rampant Mr. Baruch stridently defending his prestige as an elder statesman has made some people around the state department wonder; is Bernie an elder statesman or a prima donna? Bernie, who personally is one of the most-loved people arund Washington, simply can't bear to have his authority challenged. To differ with Bernie is a personal affront, as even his great and good friend Jimmy Byrnes discovered. At one time Bernie was seen rowing with Jimmie.

The Acheson dispute began when the state department made the mistake of releasing the Acheson-Lilinethal report on atomic energy shortly before Baruch was appointed to be U. S. atomic delegate to the United Nations. Had the Achesons report been held up and handed to Baruch privately, he could have issued it himself and doubtless it would be official U. S. policy today.

Baruch, however, called in his Wall Street experts, John Hancock of Leham Brethers and investment banker Ferdinand Eberstadt, who worked out a separate atomic energy policy. For more than a week afterward, Baruch and his advisers met secretly with Acheson at Blair House, across from the state department, trying to reconcile their conflic-rel ting view points. They are still not identified in And Bernie has virtually included inat he

"(1) Manufacture of atomic bombs shall stop.

"(2) Existing bombs shall be disposed of pursuant to the terms of the treaty, and

"(3) The (International Atomic Development) Authority shall be in possession of full information as to the know-how for the production of atomic energy."

This seems to state clearly that this country would participate in the Baruch plan for atomic energy control. Yet it must be ambiguous. For the recent conference of progressives in Chicago has seen in it a requirement "that other nations accept binding agreement not to conduct research into the military uses of atomic energy and to disclose their uranium and thorium resources while the United States retains its technical knowledge and engineering freedom, until the international system is working to our satisfaction."

Such an interpretation of the Baruch plan seems less a criticism of the plan itself than a doubt of our government's good intentions of living up to its agreements.

The basic difference between the thinking represented by the Chicago progressives and by those favoring the Baruch plan is whether we shall destroy our stock of atomic bombs before or after an international control system is set up and details of our atomic bomb manufacture are made known.

The first group feels that to delay the destruction of the bombs would be to give a green light to all-out international production for atomic war. But since this country would agree, with other countries, to renounce atomic explosives as a weapon before the bombs were destroyed, the only cause for alarm would be a belief that the United States government's word was worthless.

To release the details of atomic bomb manufacture before a control system were firmly established would seem to be more of an invitation to an armaments race than the Baruch plan. "Oh yes. Don't you think that
