No. 356, Sept. 30 Oct. 7 & 14.

John J. Wilson, Atty. NOTICE OF FINAL SETTLEMENT IN THE COUNTY COURT OF CASS COUNTY, NEBRASKA. To all persons interested in the estate of Hattie Adell Walker deceased, No. 3524: Take notice that the administratrix of said estate has filed her final report and a petition for examination and allowance of her accounts, determination of heirship, and distribution of said estate and for her discharge, which will be heard before said Court on October 23rd 1946 at ten o'clock a.m. Dated September 27, 1946. Paul E. Fauquet, County Judge No. 357, Sept. 30, Oct. 7 & 14.

Howard Gramlich, agricultural agent for the Northwestern Railroad in Chicago, will be the chief speaker at a regional P-F-L In-shup in northeastern Nebraska at Randolph on November 8. Bob Wagner, Cedar County agent, announced today that Gramlich will address the meeting for farmers in Wayne, Pierce and Cedar counties at Randolph. How Many Rats on Your Farm? Agricultural Agent, Leo Barnell, Dund county reports that Harold Gunderson from the Iowa State College Entomology Department, has worked out a plan for estimating the number of rats on a farm. To determine the rat population, here is Gunderson's formula. If rats are never seen all day after several years, and the al have from one to one hundred rats after the day, the total may range from one to one hundred rats.

Nebraska Farm Notes Rural Youth Recognizes Importance of Soil Conservation. Elmer, son of Emil Dux, 6 and one half miles west of F rbury, Nebraska, is working now to keep the soil and fertility on his father's farm, which will some day be his. Because of the boy's interest in soil conservation, Dux was one of the first to make application for assistance when the Jefferson County Soil Conservation District was organized this year. With the help of Soil Conservation Service technicians assigned to the district, a complete farm conservation plan was soon developed. As soon as the small grain was harvested contour guide lines were surveyed and a terrace system was laid out. Becoming interested in soil conservation three years ago, Elmer realized the need of action to stop erosion on his father's place. Elmer puts it this way, "Since I will probably inherit this farm some day I want it to be in as good shape then, or even better, than it is today." Conservation practices to be used included crop rotation, contour farming, terraces, grassed waterways, fences changed to provide contour field boundaries, proper crop residue management, and the seeding of grass in eroded areas for permanent pasture. Gramlich Speaks. Howard Gramlich, agricultural agent for the Northwestern Railroad in Chicago, will be the chief speaker at a regional P-F-L In-shup in northeastern Nebraska at Randolph on November 8. Bob Wagner, Cedar County agent, announced today that Gramlich will address the meeting for farmers in Wayne, Pierce and Cedar counties at Randolph. How Many Rats on Your Farm? Agricultural Agent, Leo Barnell, Dund county reports that Harold Gunderson from the Iowa State College Entomology Department, has worked out a plan for estimating the number of rats on a farm. To determine the rat population, here is Gunderson's formula. from 300 to 1,000. In lots of rats are seen at night and several every day, the total number on the farm is between 1,000 and 2,000. That population is greater during the fall because they move into the farm buildings from the fields. Beet harvest Labor shows improvement. Keith County Agent, Russen Hughes reports that the beet harvest has improved the past week with the arrival of 25 Mexican Nationals and the promise of a shipment of 75 National workers this week. The original quota of 250 for Keith county was 90 and now with 31 such workers in the county and the promise of 75 more the total number of Mexican Nationals will be 164. Quite a number of tree workers have come into the area and there are possibilities of getting more workers later this month. Beet harvest will get under way October 7 and according to Hughes beet dumps at Bruce, B I Springs, and Ogallala will open with limited deliveries Monday, 10th of beet will begin at Bruce and Big Springs on Wednesday October 9. Kiwanis Club to Honor Lancaster County P-F-L Cooperators. The Agricultural Committee of the Lincoln Kiwanis Club are planning a program for October 11 at which time the Kiwanis will pay tribute to the farmers in Lancaster county for their cooperation and he is arranging to have several county agents, is on that committee Mr. V. H. Petersen, Lancaster in Pasture-Forage Livestock work of the farmers on the program to tell what they are doing on their farms in the interest of Planning Farm Water Systems. Madison county agent Andrew Monson maintains the shortage of plumbing supplies need not keep farmers with electric service from making a start toward getting a water system. Although it is almost impossible to get all the supplies needed for a complete pressure set up, and equipment like bath room fixtures are still scarce it is still possible to start a water system. The important thing is to plan the entire layout now, then as material is available, the system can be constructed. Three things to consider in the planning is the layout of the system, the size of the pump, for the farmers particular needs, and size of the main pipes. The layout should be detailed plan of just where each outlet and pipe will be located. The layout should include plans for running water to the barn, poultry house, to the hog pen and to the feed lots. In reference to the pump, it should be large enough to do the job called for in the plans. It should be at least big enough to pump 35 gallons per hour, which is the minimum pumping capacity for the average farm. As for the main pipes they should be large enough to carry the future load demanded of them and buried deep enough to withstand the coldest winters. Monson harvested Much Bromegrass Seed from Grassed Waterway. D. E. Hutchinson, extension soil conservationist, says that the production of bromegrass seed in Nebraska for 1946 was much lower than in recent years because of dry soil conditions in the spring. In the extreme east of the state where moisture conditions were more favorable, seed production fell off because of nitrogen deficiency in old established fields. Hutchinson tells of the experience of Aaron J. Claussen, a member of the board of supervisors of the Gage county soil conservation district, who harvested considerable bromegrass seed of the certified Lincoln variety from his grassed waterways. One eight-acre waterway project produced 2,300 pounds of seed for Claussen. Another three-acre waterway yielded 750 pounds. Other bromegrass plantings on the Claussen farm produced only about 100 pounds to the acre, and that only on new seedings containing a large amount of alfalfa. Older fields of straight bromegrass did not turn out enough seed to pay for harvesting costs. Grassed waterways from which the Gage county farmer harvested his seed this year were planted two years ago. The production of certified Lincoln bromegrass in the waterways has made the former bulley a profitable part of the Claussen farm. The bromegrass-alfalfa fields are mowed for hay as soon as the

them again. He believes that the bromegrass-alfalfa fields will produce a profitable certified seed crop for several years to come. Hollywood Highlights HOLLYWOOD, (UP)- Burt Lancaster, the new movie tough guy, has revealed that he is actually of royal blood and an heir to the fabulous house of Lancaster fortune. It isn't a heritage that Burt brags. And he hasn't given up his job in Hal Waalis' technician "Desert Town" at the rarramont to wait around for that fortune. It took a lot of coaxing to get Lancaster to tell the story of his heritage at all. It's not a thing that seems important to him, although other members of the clan have gone deeply into its genealogical history. The story goes that after the fall of the house of Lancaster in the War of the Roses and the rise of Cromwell, the English government confiscated the monies that had belonged to the defeated Lancasters. The fortune, said to have run into many millions, was placed in the state treasury to be used only in dire national emergency or distress. Surviving Lancasters fled to America for refuge and passed on the story of the lost family fortune to their children and children's children. In Burt's grandfather's time they banded together and hired attorneys to press their claims to a share. "Nobody got anything out of it except the lawyers," he remarked. The laborious research into the Lancaster family tree undertaken then did disclose that the actor is a descendant of both Sir Henry (Dr. Livingston, I presume) Stanley and Field Marshal Lord Roberts. "Royal or not," Lancaster said, "I never found a producer who cared a hang about my relations when I was trying to crash Broadway. "I'm not banking on the English treasury or any dead and gone Lancasters to help me pay the American taxes here and now. "I've suggested to director Frank Borzage that he understand women so well he ought to be writing an advice to the loveless column. "Humph," said Borzage, who can't for the life of him understand why people attribute to him a supernatural ability to fathom the feminine mind. "Women are easy to understand," he said. "The biggest fool in history was the first man who said women

are a mystery," Borzage insisted. "Just as Kipling said, 'women are wiser than the gods.' And as the secret know one and you know 10-20 at." Borzage is what he calls a "woman's therapist." He is so sure to project a woman's thoughts and desires on the screen, he has won more than one Academy award, the first time the best with an Oscar for directing James Cagney in "Seven Years." He did other notable jobs with great prizes in "Farewell to Arms" and "With Every Breath in God's Hand." He directed "The Sign of the Cross" and "The Sign of the Cross" and discovered Catherine Deneuve in "Five Wives Later 1944." Now he is Universal International's "Magnificent Don," Borzage is directing Miss Rogers in the role of the beautiful, glamorous Lady Hamilton. "She is sort of a legend now but when we get through with her the public will know she was a woman, after all, and a pretty human one," Borzage said. "She wouldn't be interesting if she weren't human. A queen who acts like a queen isn't interesting and neither is a chambermaid who acts like a chambermaid. A very nice man, who knew his women, once said: "Treat a duchess like a charwoman and a charwoman like a duchess, if you want to be a successful lover." I think that applies to a director, too. "Just now," interrupted Miss Rogers, "are you treating me?" "Ah, Ginger," he said gallantly, "you are the exception that proves the rule. Always treat an actress like an actress."

San Francisco, (UP)—The makers of that G. I. delicacy Spam, set up a free lunch counter for the parade weary legionaries but Wednesday there were 32,000 sandwiches left over. They hoped to distribute the surplus to school children, too young to have been to war. Refrigerators should be defrosted whenever the frost b e comes one-fourth to one-half inch thick.

Can The SOAP SHORTAGE Get WORSE? New U S Methods Of Skin Grafting Shown Italians ROME (UP)—Dr. Joseph Calligarisone of Kings County Hospital in Brooklyn, a specialist in maxillo-facial and plastic surgery, has arrived in Italy on the invitation of the Italian government to hold a series of lectures on splinting skin grafting in the treatment of burns. As a representative and vice president of "American Medical Aid for Italy," Dr. Calligarisone has brought 19 "Padger dermone" instruments used for skin grafting as a gift to Italian universities. With every donation he makes a motion picture demonstration lecture of his various successful skin grafting, maxillo-facial, and plastic surgical cases. With each lecture he gives a practical demonstration of the use of the new instrument. He has already demonstrated and donated the instrument to the clinics of Palermo, Catania and the Polyclinic Umberto I. University of Rome. His itinerary will take him

to other Italian university cities. He will remain in Italy several more weeks. Before coming to Italy, Dr. Calligarisone had just produced in the United States 1,500 cases of skin grafting with the new instrument known as "Padger dermone," which supersedes his own invention, the "Calligarisone knife," used in skin grafting heretofore. Interviewed in Rome, Dr. Calligarisone said: "They are still using my knife over here. The Russians recently ordered 500 of them. I am trying to persuade plastic surgeons here to discard my knife and use the 'Padger dermone,' which is more modern, accurate and practical."
