

Scrapping Of Food Board Is British Idea

WASHINGTON, (UP) Britain, Saturday, October 26, plans for an independent world food board to be scrapped in favor of a more sweeping international authority controlling commodities as rubber and metals as well as food.

Combined with United States opposition, the British position appeared to kill any remaining hope for adoption of the food board plan at the current meeting of the United Nations Food and Agriculture Organization.

The board was headed by a 23-page report to the FAO preparatory commission last to express its preference for an international authority with control over many rather than single commodities.

Britain said it believed the most suitable agency would be the proposed international trade organization now being set up in London.

Owner Tom Yawkey appears to be figuring it out from ringside seat at World Series. Most people believed man of many millions had right answer in Red Sox.

Representing Paris Post No. 1 Sedley Peck, above, came all the way from the French capital to attend the 28th annual American Legion convention in San Francisco. Peck, now a newspaperman, is one of the A. E. F. doughboys who remained in France after World War I.

insects begin to bother; and it is almost impossible to plant them without some kind of success when spring rolls around.

Nevertheless care in planting will reduce hazards, and one of the greatest hazards to newly planted bulbs is provided by frost action. Alternate freezing and thawing of moist soil, contracts and expands it, producing an effect which gardeners call "heaving." Shallow rooted plants are often pushed up out of the ground by this "heaving" until their roots are entirely exposed. When soil has been newly turned, this action is exaggerated, and bulbs which have not been planted deeply enough may be lifted up to the surface.

The remedy is to be sure your bulbs are planted the proper depth, and then after the ground has been frozen, cover it with a mulch of leaves or similar substance that will shade the soil from the winter sun and prevent the thawing out which causes heaving.

A good rule to follow when in doubt is to plant on the deep side. In other words, less harm will be done by planting too deep than too shallow.

When it is intended to allow tips to remain where you plant them several years rather than dig them up after they have blossomed and their leaves have turned yellow each summer, they should be planted two or three inches deeper than the normal depth.

Deep planting may cause flowering to be somewhat later, so all bulbs which it is desired shall blossom at the same time should be planted the same depth.

Madonna lilies are an exception to the general practice with lilies. They should not be covered more than three inches.

Drainage is an important part of any bulb planting, and every precaution should be taken to avoid standing water, or over-soaked beds, which will cause rotting of the bulbs. In cases where doubt arises as to what will occur during the wet days of early spring, or where the soil is particularly heavy, raise the bed about 6 inches from the level of the garden.

Bulbs do not need a very rich soil, as they have considerable food stored up in themselves. An application of plant food will, however, help them to produce bigger flowers. Do not apply a barnyard manure, as they have a particular aversion to it.

In 1935, 31,700 soil samples taken from 2,154 farms and representing 100,200 acres were tested by the University of Illinois soil-testing laboratories.

Don't Be Misled By False Slogans By Deceptive Propaganda

THE "RIGHT TO WORK" slogan is camouflage for the amendment proposed by the Nebraska Small Business Men's association.

THE REAL OBJECTIVE of these camouflaged Big Business Men is to destroy the inalienable freedoms of all American workers.

1. FREEDOM OF SECURITY (FEAR)
2. FREEDOM OF COLLECTIVE BARGAINING (SPEECH)
3. FREEDOM OF COLLECTIVE SECURITY (WANT)
4. FREEDOM TO LIVE THE AMERICAN WAY OF LIFE.

YES, THE WORKER—THE FARMER—THE HOUSEWIFE—THE PUBLIC—ARE WORRIED WHEN THE FOUR FREEDOMS ARE THREATENED.

The worker is worried because of the fear of losing his job without union security. Because when unions are crushed, big business depresses wages and working conditions in order to increase profits.

The farmer is worried because of want of consumer purchasing power. Because when unions are crushed, big business mortgages farm prosperity.

The housewife is worried because of lack of income to give her purchasing power. Because when unions are crushed, the American standard of living is destroyed.

The public is worried, because when unions are crushed, labor lacks purchasing power—industries fail—farmers fail—prosperity declines—depressions come and the public always pays the bill.
