TALKING! TURKEY!

Yes... we're really "talking turkey" when we tell you just how much time and work that new automatic electric range will save you. When you have prepared your Thanksgiving dinner—place it in the oven, set the timer clock, and that's all. You have all the time you would ordinarily spend over a "hot stove" to be with your holiday guests, while the ever-faithful timer clock turns the oven on then at the proper time turns the oven off. What's more you'll find that your fowl or roast when cooked, is not at all dried out but moist and tender. When you cook your vegetables on top of the electric range—they'll be tastier and more nutritious, for you need less water to cook on electric elements. And then you'll love the deep-well cooker of the range to stew the left-over roast and vegetables or to reheat the turkey for a late evening snack. Yes... we're really "talking turkey" when we say the wonderful new automatic electric range just can't be beat. See your electric range dealer now.
