A FRIENDLY WARNING
About that old prescription Dr. Jones wrote for you two years ago. The bottle is on the shelf in your medicine cabinet, about one-fourth full. It would be safer for you and your family to discard it. Someone might take it by mistake, or a child may be attracted to it by the bright color and do himself harm. Many medicines deteriorate after exposure to light and air. On long standing, some compounds change their chemical structure. Yes, the safe thing to do is to throw it away. If illness again overtakes you, see your doctor. Bring his prescriptions to us for accurate compounding.
