## Robert Kelly, Jr., Former Resident, Weds in Los Angeles

The home of Robert E. Kelly, sr., 420 Rodena Avenue, Los Angeles was the scene of a very pretty wedding Sunday, June 15, when Miss Dorothy May Cumberland became the bride of Robert Elmo Kelly, jr., in a double ring ceremony solemnized by the Rev. Raymond Wisner.

Miss Cumberland wore a pure white street dress and carried a bride's bouquet of white gladioli. Her only attendant, Miss Comma Ann Kelly, was also dressed in white and wore a corsage of pink sweet peas.

The groom was attended by his brother, John Kelly, and both wore business suits.

Preceding the ceremony a wedding dinner was served to thirty guests.

A reception followed with the Misses Analee and Marilyn Galland and Comma Ann Kelly presiding over the wedding cake and punch bowl.

Miss Millie Wisner sang "I Love You Truly" accompanied by Mrs. Lawrence Wisner, who also played the wedding march.

The couple will be at home at 717 Margaret Street, Los Angeles, 22, Calif.

The Kelly family lived here for several years up until about four years ago.

## WASHINGTON REPORT

By Howard Buffett  
Congressman, 2nd  
Nebraska District

The bi-partisan sons who have been writing billion dollar checks to foreigners against the U. S. Treasury are beginning to be disturbed. Several of them, including even Senator Vandenberg, are now suggesting that perhaps we should take an inventory of our capacity for hand-outs.

What a novel proposal this is now—after billions have been poured into the postwar foreign spending spree, often called Operation Hathole. Over two years ago March 15, 1945, this column reported:

"How much more can America donate to the world and remain a solvent nation? Congress should come up with the answer to that one before okaying additional handout schemes."

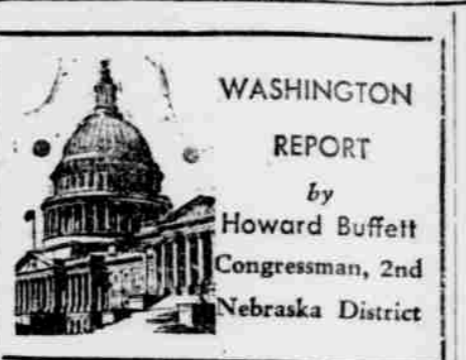

However, better late than never. An honest inventory job is still worthwhile. One significant factor in this inventory of resources is our physical wealth. The Library of Congress has furnished me data on the total assessed value of property in the U. S. The total assessed value for tangible property is 146 billion. Generally the data used in compiling these statistics is based on 1945 tax assessments.

This \$148 billion valuation for all taxable property in America is approximately 57 per cent of the present national debt. Using this percentage is one way to measure your share of the national debt. Suppose your home or farm is assessed at \$5700. Then the national debt mortgage on your place figures out at about \$10,000.

In practice, property is generally not assessed at its market value. Probably its full value is at least double the tax valuation. On that basis all private property in America is worth \$296 billion. The federal government mortgage alone (the public debt) is \$257 billion. This year is the first in seventeen years that the government can pay the interest on that debt without using borrowed money.

My long campaign against reckless lending has never been because of a lack of sympathy for suffering people. But we can do oppressed people abroad no permanent good unless we preserve liberty and free enterprise in America. Before we can save others, we must get our own financial house in order. And so a sound appraisal of our assets and liabilities is still imperative.

Poultrymen save from seven to 15 per cent in grain and mash feeds by growing pullets on good range pasture rather than on bare range.
