When the Ounce of Prevention Fails

★ Warning against accidents in the home and on the highways is old stuff to most of us. Many industries have made real progress in accident prevention, but our homes continue to produce minor and major injuries on an ever-increasing scale.

In spite of every precaution, accidents will occur. When the "ounce of prevention" fails, it is wise to have "the pound of cure" ready and at hand. See that your medicine cabinet is amply stocked with standard first-aid materials. Keep a first-aid kit in the pocket of your car. We shall be pleased to help you select the essential items from our complete stock.
