CLINTON P. ANDERSON
Secretary of Agriculture Says:

American Women—
Your Used Fats
Are Still Needed!

America's homemakers have saved and turned in over 600 million pounds of used cooking fats since 1942. This is an average of nearly 20 pounds for each family in the United States. It is a record of which every woman can be proud.

However, it is still necessary to conserve every pound of fat, since the over-all fat supply situation is little better now than it was last year when we were desperately short, particularly of industrial fats.

Manufacture of many of the things we all use and wear in our daily lives requires industrial fats or the products of industrial fats. Used cooking fats turned in by American women have been and continue to represent an important part of our total industrial fats supply. Every pound of salvaged fat helps meet the need.

"I AIN'T VERY MUCH, BUT..."

★ In the play *Green Pastures*, the character Noah observed, "I ain't very much, but I've all I got." This is simple but eloquent reasoning.

The realization of responsibility to yourself and to others to be cheerful, sympathetic, and helpful is the basis of a sound personality. Ill and disgruntled people are a burden to all. Take good care of yourself. Do not forget that both your family physician and your pharmacist are on your side to help you stay well and happy. All you have to do is ask for their help. When ill, see your physician. We are fully equipped to fill your prescriptions and furnish the needed sickroom supplies.
