

## World Day of Prayer Has Fine Service

The World Day of Prayer of 1948 was most successful reports state in the services and in the general results.

The Youth section of the services were held on Thursday, February 12, at the First Presbyterian church with Mrs. E. H. Bernhardt as the general chairman of the service. There were fifty present and members from the Methodist, Christian, Evan-

gelical United Brethren and Presbyterian churches taking part. Richard Sack was the leader with Eleanor Giles Schade as the organist. The collection was taken for the educational work of the church.

The larger series of the meeting was held on Friday, February 13th. The First Christian, Presbyterian, St. Luke's Episcopal, St. Paul's Evangelical, Methodist and United Brethren churches participating.

The meeting for the adults was held at the First Christian church with Mrs. P. F. Rihn as leader with some eighty present and the collection \$35.25. The theme was "The World at Prayer." The day begins west of the International Date Line with the Fiji Islanders and New Zealand, while in this country the people were still sleeping on Thursday and closed forty hours later with the far clod Eskimo on little St. Lawrence island off the coast of Alaska.

This year the authors of the 1948 service used the "Lord's Prayer" as the basis for prayer and meditation and was described by Mrs. George Topliff, "Why We Pray" by Miss Hanson, "When We Pray" by Mrs. E. G. Off, and "For What We Pray" by Mrs. Alwin.

The Methodist group, Messrs Earl Carr, Hallie Perry, Glen McClure, and John Rishel, presented "How the World Day of Prayer Began and Grew."

Mrs. Rihn then began the ritual, "Our Father Who Art in Heaven," followed by the story of Moses "Who Saw a Light and Heard a Voice" told by Mrs. Rex Young, prayer by Mrs. Hanson, Mrs. Adam Keffenberger of the St. Paul's church led in "Thy Kingdom Come, Thy Will Be Done on Earth as it is in Heaven," with audience in response.

During this period the preamble of the United Nations was recited for meditation and Mrs. E. J. Moritz read John 17:1-24. Mrs. Short gave the story of four chaplains who gave their life jackets to four service men and forced them into life boats while they sank with the Dorchester twenty-four minutes after she was torpedoed.

"Give us this day our daily bread," was presented in song in unison, "Break Thou the Bread of Life," and solo "Bread of the World" by Mrs. Ray Herring. The Episcopal ladies with Mrs. Roberts as leader read the ritual of "Forgive us our trespasses as we forgive those who trespass against us." The story of the Mother's sorrow on losing her only son in Navy service and her comfort in reading of the Mother of Jesus in her Son's

## 'Get O-U-T of Here!'

This sea elephant bull protests violently at the photographer's intrusion of his domestic privacy. The picture was taken on tiny U. S.-owned Heard Island, in the Indian Ocean, midway between Australia and the southern tip of Africa. Fourteen scientists of the Australian National Antarctic Research Expedition have established a base there and will remain a year.

### Cass County Extension Notes Characteristics of a Durable Iron

Are you planning to buy an electric iron in the near future? If so, now is the time to set down and think what makes a good iron. Maybe you would like to clip the following points out of this paper and slip into your purse. It would be handy when looking at different irons. Check several makes of irons to find the one most desirable for your purpose.

1. Size. Iron surface of approximately 25 square inches.
2. Sole Plate—(1) Narrow Point 2. (Bevelled edges). 3. Rounded or near round rear corners.
- (4) Hard, non-scratchable, non-corrosive and polished surface. Tapering sides. 6. Good heating conductor for uniform heating.
3. Heating Element. 1. Rapid heat-up. 2. Produce uniform heating. 3. Durable construction—will not break when dropped. 4. Constant temperature for each thermostat setting while ironing.
4. Entire Iron. 1. Properly balanced weight distribution. 2. Light weight. 3. Low heat loss through top (below hand). 4.

crucifixion, was given by Mrs. James Begley. "Prayer" by Mrs. Cummins. Mrs. Walter Tritsch read Leslie D. Weatherhead's precept on "Forgiveness," England's great Christian leader. The ritual continued with "Lead us not into Temptation, But deliver us from evil," with song in unison, "Lead on Oh King Eternal" and "For Thine is the Kingdom and the Power and the Glory forever."

The Presbyterian ladies as Six Voices reviewed the projects for which the offering is given, they being Mesdames Searl Davis, Paul Jahrig, Floyd Becker, T. I. Friest, Glen Vallery, Wm. Schmidtmann. These projects are the Migrants, Sharecroppers, American Indians, Union Christian Colleges in China, Japan and India, and Literature for native people of these countries, and Christian Homes for foreign students in this country. Mrs. McClusky concluded the ritual after solo, "Lord's Prayer" by Eleanor Schade and receiving the offering. Doxology and benediction by Rev. Meritz.

5. Handle shaped for comfortable grip. 6. Permanently attached coil cord. 7. Tip-up stand. 8. Thermostat marked for fabrics. 9. Temperature control easily accessible. 10. Safe from shock and fire hazard.

### A Word of Caution on New Insecticides.

Poultry producers should perhaps be reminded again at this time that some of the insecticides offered on the market are not recommended by your Agricultural College Entomologists, who have tried and tested the products on an impartial study.

Chlordane known as (1068) is not recommended by the State Entomology Department for use in any form to control parasites on any farm animals.

Another caution is not to use Benzene Hexachloride also known as (BHC or 666) on poultry houses or on other livestock other than swine.

Benzene hexachloride is recommended only for the control of mange on hogs, when used in a 0.25 percent gamma isomer strength. For further information on use of BHC for mange control on swine, secure Extension Circular 1548, available at the County Extension office.

### Hubam Sweet Clover

Every few years there is a wave of interest in Hubam clover. It must be kept in mind that Hubam plowed under when in full growth and before it sets seed will add all at one-half as much nitrogen to the soil as one year of biennial.

If Hubam is plowed after seed is harvested the amount of nitrogen is about one-thirtieth as much as biennial. In any case Hubam is not adequate by itself, and will need to be supplemented by manure or commercial nitrogen fertilizer.

Faith, Hope and Charity NEW YORK (AP)—The Protestant Episcopal Church was having trouble finding headquarters for its City Mission Society while the church's 83-year-old St. Barnabas House was being rebuilt. The problem was solved when Francis Cardinal Spellman and the Roman Catholic Archdiocese of New York leased to the Protestant Church four buildings in the Bronx for \$1 a year.

Invited Inspection AUSTIN, Tex. (AP)—A Chicago man might have gotten away with marijuana valued at \$25,000 except for a small detail. He was driving a car with 1946 Illinois license plates. That caused two highway patrolmen to stop him. The marijuana was contained in two small barrels.

Tropical hardwoods furnish nine per cent of all timber cut and used, according to the Encyclopedia Britannica.

## March First is Moving Day in Farm Districts

March first is traditionally moving day for farm renters.

The University of Nebraska department of rural economics has some pertinent reminders for farm renters.

Even tenants who remain on the farm they now occupy will be extending an old agreement or making a new contract.

Whether a tenant farmer intends to stay on the farm where he is or to move to a new farm, a written lease is important. Lease forms can be obtained from the county agricultural agent or the local banker.

The rural economists warn that it is important that both the landowner and the renter should be certain that terms of the contract between them are fully understood. A few minutes spent by both parties in the studying of the lease may prevent future disagreements.

Renters who remain on the same farm ought to work out their cropping system for 1948 in cooperation with the landlord. If the old lease is retained under a continuation clause, a written crop supplement is desirable. Such an arrangement may prevent an argument and misunderstanding later in the year.

The rural economists suggest that the cropping system be based upon the recommendations for the classes of land in the individual farm. A guide to soil conservation farming for the county where the farm is located or for an adjoining county is a valuable help and reference in working out a cropping system.
