## A little care saves a lot of wear!

A Spring change from contaminated, old winter oil to N<sup>th</sup> Motor Oil protects from grit and dust that can ruin the inside as well as the outside finish of your car!

Conoco N<sup>th</sup> Motor Oil (Patented)\* contains a special added ingredient that fastens an extra film of lubricant so closely to metal that metal surfaces are actually OIL-PLATED!

Copyright 1948, Continental Oil Company \*U. S. Pat. Nos. 1,944,941 and 2,218,132

This OIL-PLATING stays up on cylinder walls while you're running hot and when you're not... won't all drain down into the crankcase even overnight! That's why N<sup>th</sup> Oil extra-protects from "dry-friction" starts... from sludge and carbon caused by wear.

So, for extra-cool, extra-powerful, extra low-cost miles...

Make a date to OIL-PLATE!
