

### Plattsmouth Service Club Is Disbanded

During the days of the world war II, when the nation was exerting its utmost in sacrifices of service of the battle field and sea, in the factory, in the homes, a move national wide, was organized to supply canteens at large rail centers in the country to aid the soldiers and sailors on their leaves at home and on their journeys. One of the large canteens in the west was at Omaha Union station, where each day hundreds of the boys were passing through. The Plattsmouth people, especially the ladies joined in this canteen work and on the first Saturday of each month Plattsmouth Service Club furnished the foodstuff for the canteen service.

The local people did a great job of helping cheer the boys coming to and from the scenes of active duty and continued in operation for the year March 1945 to March 1946. The local group

### GREETINGS, DAD!

When you shop for a Father's Day card, you'll find there's one to suit about every possible type of Dad. There are cute ones like that at left, above, suitable for a very young Junior to send to Senior Dad might get a reminiscent smile out of the center card or a chuckle from the "comic" like the hill-billy card at right, above. Some cards are symbolic, like the one at left, where the shepherd dog typifies the guardian of the flock's steadfast courage and watchfulness. And there are cards of the utmost simplicity, like the plaid-backed greeting at right, below.

paper containers do; and, though food must be thawed somewhat for removal, there is no leakage from the container in thawing.

Disadvantages of glass jars in general are: they are breakable; because they are round, they take up more space in freezers than rectangular paper containers; they become frosty on the surface when removed from the freezer so are slippery to handle without tongs. The new "freezer jars" are more convenient than ordinary glass jars because the sides are straight so that food slips out easily after slight defrosting.

The County Extension office has a new bulletin "Food Preservation by Freezing" which covers freezing of fruits, vegetables, meat, poultry and fish.

### Cass County Extension Notes

Hens Lay Fresh Eggs  
It is not the fault of the hen if the poultryman's egg checks are small. The hen produces a top quality product in a clean package. It is the job of the poultryman from there on. Here are a few suggestions that will improve quality of eggs: 1) Gather eggs 2 or 3 times a day. 2) Place them in a wire basket so they will cool quickly. 3) Store eggs in a cool place (basement or cellar will help). 4) Keep eggs clean. 5) Market eggs frequently. ## Attention Farmers!

There is still time to plant sweet corn and harvest it in time for fall seeding. On good ground with favorable weather conditions this corn will produce 4 to 5 ton per acre at \$20.00 per ton. We will have enough mechanical pickers to harvest all crops. We can use three or four hundred acres to be planted within the next two weeks.
