HY-LINE BABY CHICKS

Yes we are taking orders for 1949 Chicks now. The reasons: Hy Lines sell out every year. The demand is big and the supply is limited. People who had Hy Lines this year have already reordered for next year. You cannot buy these chickens from any place in Nebraska except through Hill's Hatchery and their dealers.

In 1942 there were only 126,000 Hy Lines produced in the United States. In 1948 there were 8,300,000 produced and there would have been more sold if they had been available. Do not confuse Hy Lines with Crossbreeds. We would like to see Cass County get its share of these chickens. We have called on a lot of farmers and will call on more. But we cannot see all of you. So if you are in town, stop in at the Creamery and let us tell you more about these wonderful chickens or call us and we will come and see. We know you are busy and so are we, so we will not take over ten minutes to tell you about these chickens. Do not wait because these chickens are going fast.

We can still book orders for the time you would like to have them, so order today and get your Hy Lines when you want them.
