

Charles Patch Enjoys Hunting Trip in West

Charles Patch of the Cass drug store, departed Friday on a hunting trip to the north and west part of the state where he will hunt the elusive pheasant in the vicinity of Bassett, Nebraska, near his old home. When a boy of eight years of age, Charles was presented by his father a gun, and often has enjoyed hunting parties with the father. The father asked

that every year they might enjoy hunting together in the sandhills, this custom was followed until the war when Charles was engaged in shooting for bigger game in the American armed forces. The past two years he has followed out the wishes of the father in the hunt.

Harry C. White Will Lecture on Electric Progress

(Plattsmouth H. S. "Platter")
One of the most familiar figures on the lecture platform in the Mid-West will present his new program, "Man's Progress Through the Ages", at the Plattsmouth high school on November 2 at 11:00 a. m. This lecture combines many exciting adventures into the world of science and all of his inspiring address is illustrated with demonstrations. He brings with him to the stage, a complete research laboratory, a long with a rare collection of old lamps, as well as the newest type of scientific equipment.

HARRY C. WHITE

One of his most fascinating demonstrations and stories is the high-lights in the life of Madam Curie, discoverer of Radium. Harry C. White talks about and demonstrates the very latest in Radium Cosmic and Radio-active materials.

Since Electricity plays so great a part in the present work of science, Mr. White will show Electricity and work with it in lighting lamps with his hands and demonstrate the wonders of its laws, induction, conduction and many others. His new "Tele-touch", an instrument that transmits electric waves, will reveal unusual happenings when these waves are intercepted by the human hand.

Mr. White is well qualified to speak on the magic and wonder of color. He is President and General Manager of the U. V. Color Company of New Jersey, and has discovered many unusual things in his work with fluorescent lighting. His hand-painted tapestries and brilliantly colored robes when under fluorescent lights are beautiful beyond description. The colors actually seem to live.

Mr. White will show a new and unusual collection of silk that was used in World War II to signal men high in the sky. His closing picture is the building of the American flag by Betsy Ross, at the request of General George Washington. In this, you will actually see how our flag was built, understand a little more of Washington's prayer at Valley Forge, and see the flag of America lighted by chemicals under black light in darkness.

For a fascinating, educational, and inspirational lecture, Mr. Harry White's program is superior. His remarks are easily understood by all of his audience from school age on up.

John Meisinger, Jr., of this city had a very pleasant surprise given him on Thursday evening when he received a telephone call from a daughter, Mrs. Gerald Cady, of South San Francisco. The call was to congratulate Mr. Meisinger on his seventieth birthday anniversary and came as a most pleasant treat to all of the members of the family circle.

Mr. and Mrs. Paul D. Jahrig and Phillip Keil and Bernese Smith were guests at the home of Mr. and Mrs. Charles Witt of Wayne, on Sunday. While there the men enjoyed hunting pheasants. Mrs. Witt is the former Mary Hicks, a member of the local high school faculty, a few years ago.
