Owing to the fact that Leon Bond had just returned home after having spent several days at a hospital, he was unable to attend the meeting of the Christian church, the members decided that if he could not go to the church, then they would take the meeting to him, at his home, east of town. After the close of the meeting, Mrs. Bond served a lunch and a social hour was enjoyed by the members of society, who were present.

Dicky Kirchoff, who returned home recently from a hospital, after undergoing surgery for injuries to his spine, will always have reasons to remember the kindness of his neighbors, who went to the farm which he rented, this summer, and with five corn pickers, and two men with tractors, soon completed the picking of his corn. Those who furnished and operated mechanical corn pickers were Stecky Seed Corn Co., with Mynard Brun, operator; George Kirchoff, Lloyd Ranney, Henry Grafe, and William Newham, while Henry Dankliff and Martin Petersen, operated their tractors. The corn was on the Ed Pankonin farm.

Cass County Extension Notes
Water Plants Before Freeze
LINCOLN—Extension Forester, Earl G. Maxwell of the University of Nebraska is advising farmers and townpeople to water their trees, shrubs, grass and other plants now — before a hard freeze sets in.

Winter injury to plants doesn't come from freezing only. Dryness does a big share of the damage. He recommends soaking the ground around plants to a 12-inch depth or more.

Strawberry, raspberry, and rose bushes need particular attention, evergreen trees should not be overlooked. They stay green the year around and take and need lots of water.

Let a slow stream from the garden hose run around the plant, he advises, to get a good soaking effect.

Bang's Disease Hurts Milking
Livestockmen, especially dairy farmers, suffer a severe economic loss each year from brucellosis or bang's disease.

Dr. S. W. Alford, animal pathologist at the University of Nebraska, estimates the loss in milk production of diseased herds at 22 percent. In addition, he says, the calf crop in diseased herds is reduced by 40 per cent, and 22 percent. In addition, he says, will become sterile.

The livestockman, Dr. Alford declares, will have to replace one
