Mrs. Daisy McNealey went to Omaha Friday morning where she will stay with the children of Mr. and Mrs. Scott Schroeder, while their parents are on a short vacation.

Miss Daisy Schlater was on the sick list this week.

Easiest Bulbs to Grow in House, Flower in Water

Easiest flowers for the amateur to grow in the house this winter are bulbs which need only water to enable them to flower. Botanists say a bulb is a storehouse containing a new plant, plus food and energy sufficient to carry it to maturity. Warmth and light start up growth, but this must not be too rapid.

Paper white narcissi, its yellow cousin narcissus soliel d'or, and top size hyacinths are the varieties most commonly grown in water without soil; but crocuses, and grape hyacinths can be grown in bowls containing bulb fibre, and lily of the valley pips will flower in bowls with wet sphagnum moss packed about their roots.

Failure is usually due to fast growth stimulated by high temperatures, which result in scanty roots, spindly top growth, and no flowers at all, or very poor ones.

Whether grown in gravel and water, bulb fibre, or soil, containers several inches deep should be used, so there is plenty of room for roots.

Set the bulbs close together, but do not let them touch. There should be two inches of gravel, soil or fibre below them, and water should be kept only high enough to touch the base of the bulbs.

Root formation precedes top growth and should take four weeks. A temperature below 60 degrees is essential, and it may be kept below 50. Roots develop best in the dark, but with these bulbs a subdued light is permissible. When the roots are fully developed, top growth will begin, and at this stage the bulbs can be given more light though it is well to keep them out of direct sun until flower stalks begin to develop. Then give them all the light possible.

Root formation will result if a temperature of 65 degrees is never exceeded. Be careful to keep the plants away from steam pipes and radiators, or living rooms heated above 70 degrees. They should be near windows where there is light

Paper White Narcissus.

and temperatures are lower. An enclosed porch or sunporch where ventilation can be given, and temperatures kept down, is the best place for the winter garden.

Large bulbs of Dutch hyacinths can be grown in water in special glasses, which support the bulb just above the water, in which their roots develop. It takes 10 to 12 weeks for the roots to develop, in a dark place, in cool temperature. When roots fill the glass, and top growth begins, accustom the plant gradually to light, and grow them slowly in a temperature under 65 degrees.

Marys' with Mrs. Harold Finch accompanying the ladies. A piano duet, "Country Gardens" by Mrs. Beulah Sanford and Mrs. Ora Guerra. Mrs. Harold Finch then sang two numbers, "Ships of Destiny" and "A Song in My Heart." She was accompanied at the piano by her mother, Mrs. Earl Upton. The Auxiliary song was then sung by the ladies, led by Mrs. Earl Upton, Mrs. J. E. Yost of Milford, 12th District President, then gave a very fine report of the National Convention at Miami, Fl., which she had attended recently. After her interesting report, she entertained the guests with pictures shown on the screen, of many beautiful places she had visited, also pictures of the convention in session. After the "Penny March," Nehawka Unit invited the County Convention to meet there next spring. After the retirement of the colors, the ladies of the Union Unit, served delicious ice cream, cake and coffee, from an attractive table covered with a lace cloth, a center piece of beautiful, colored chrysanthemums, and white tapers on each end. Mrs. Harry Gableman poured and served the coffee. And so ended a very fine convention.

Mrs. Arthur Foster was hostess to the Union Woman's Club last Tuesday afternoon. Nineteen members attended. Mrs. Paul Madsen gave a very fine report of the Cass county Woman's Club Convention at Alamo recently. Mrs. Roy Frans then introduced the speaker for the afternoon's meeting, Miss Louise Mears, of Peru. Miss Mears told many interesting historical things about southeastern Nebraska. Later, she told of the International peace gardens which she had visited and learned much of the history of this historic spot. Miss Mears has written several books, one of which is called "The Hills of Peru." Mrs. Paul Madsen then favored the guests with a vocal solo, "A Russian Lullaby." Mrs. Howard Snodgrass accompanied Mrs. Madsen on the piano. The hostess with her assistants, Mrs. L. B. Mongly and Mrs. Kathryn Madsen, then served very delicious refreshments. The next meeting on Dec. 7th, will be at the home of Mrs. Melvin Todd and will be a Christmas luncheon honoring county and district officers.

ODDS AGAINST THEM
COLUMBUS, O. (U.S.) — The odds against a family with children finding housing in Ohio's capital city today are 2.51 to 1, the city housing board reported. The board has had only one recent offer of housing for couples with children. There were 2,581 applicants for that vacancy.

Suffered After Every Meal Due To Acid Indigestion

Recently, a well-known man stated that he used to feel like a swollen balloon after every meal. He would bloat full of gas and acidulous liquids for hours after eating. Was terribly constipated. This man is one of the hundreds in this vicinity who now praise INNER-AID. He states he was amazed at the results when he took this medicine. Now he eats what he wants without gas or bloating, and bowels are regular for the first time in years. He feels like a new man.

INNER-AID contains 12 Great Herbs; they cleanse bowels, clear gas from stomach, act on sluggish liver and kidneys. Miserable people soon feel different all over. So don't go on suffering! Get INNER-AID. Sold by all drug stores. —7-1-48 D

Striving for Even Higher Beer-Selling Standards

The privilege of selling beer carries the duty of conducting the business within the law and the rules of good conduct.

The state and not the brewing industry selects the beer retailers. The industry is as keenly interested as the state in having good, competent beer retailers.

That is why the beer industry in Nebraska cooperates with the state to insure that beer retailers know the legal requirements for clean lawful operation.

During 10 years of this program of "Self-Regulation" and cooperation by the industry and the state, it has been proven that the Nebraska law is adequate and sufficient for satisfactory beer retailing.

The brewing industry will ever strive for high retailing standards.

Above everything else... a good car!

Pontiac has one manufacturing principle which takes precedence over all others: Pontiac must always be a good car!

There is no other motor car quality which people value so much as *goodness*. That's why Pontiac engineers and production specialists spend so much time and energy and money to insure Pontiac quality. Pontiac cars must last long—and they must last well—and they must function through the years with a minimum of upkeep cost.

Owners have been quick to appreciate this. Some of the testimonials they send to the factory, and to Pontiac dealers, tell of performance feats that seem almost impossible of attainment.

Pontiac has many other outstanding virtues, of course. It is a wonderful performer. It is delightfully comfortable and easy to handle. It is a great beauty, and unusually distinctive in appearance.

But its greatest virtue is *goodness*. This year, or any year, you just can't beat it for faithful performance.

**General Motors Hydra-Matic Drive and White Sidewall Tires and Bumper Guards optional at additional cost.*
