PLATTSMOUTH CAN DO IT

For many years a greater share of the citizens of Plattsmouth have been clamoring for a more adequate street marker system. It cannot be denied that anything resembling a system would be far superior to what we have at present.

It will not be long until residents of the city will be given the opportunity to prove they are sincere in their demands. An idea hatched at a Chamber of Commerce meeting many months ago is gradually taking form. At last Monday night's city council meeting, the gentlemen steering your destiny gave the movement impetus by furnishing the cash for the initial order covering a number of intersection markers to be placed in the downtown area and on Wintersteen Hill. The latter, of course, was to reassure those on "The Hill", who have long been under the impression that they are the forgotten people, in which we

Complete details of the plan will be announced at an early date. Until then. many members of the Chamber have their fingers crossed, but not this newspaper. For the first time in Nebraska's history a sales tax measure has reached the floor of the Legislature. This bill will come up a parade at one o'clock. for debate in the very near future with strong pressure group backing.

This writer has never been a supporter of a sales tax, having had experience with his matter in Kansas and several other states. In most instances it has proved nothing but another tax, more dollars to be divided among departments to spend and spend and spend.

We think, up to now, the present Legislature has done a magnificent job in sifting the grain from the chaff. We admire the grit of a number of our legislative members, including Wm, Metzger, for their untiring efforts in scrutinizing the budgets and expenditures of every state agency. We believe most department heads will examine more closely for what and where the tax dollars are going during the com-

If it was possible for Nebraska to have a "Homestead Law" patterned after the state of Iowa, a Sales Tax would have some justification. But to use a sales tax for a blanket reduction in real estate taxes would be a rank injustice to the workingman or

If their is any justice in reducing the real estate tax on a rental property that is bringing the owner anywhere from \$600 to \$1,500 a year in rents and is on the tax rolls at \$80 to \$163, we fail to see it.

To reduce the tax load on the owneroccupied dwelling, yes, we can go along on the basis that it would encourage home ownership. We think our legislative body should study this law very carefully before we get our fingers burned.

Governor Izard encountered serious opposition from the very beginning. In the first place, he was looked upon as a carpet-bagger" by many disappointed applicants for his job -including Cuming - who had lived in the territory all of a few months. In the second place, he was accused of forming an alliance with Omaha interests to the detriment of the rest of the

This charge was levied against firtually every territorial exective (Acting Governor Cumng, you will recall, had been bitterly assailed on the same grounds) but Governor Izard gave substance to the charge by his failure to travel about he territory as much as his constituents thought he should and by his veto of a bill removing the capital from Omaha.

Governor Izard's capacity for he job of chief executive frequently was called into question by his contemporaries, and the erritorial press often referred to him contemptuously as "Governor Lizard." Weary of this sort of criticism, he resigned in 1857 and returned to Arkansas, where he died in August, 1866. Although never achieving the

brilliance exhibited by men like Cuming, Richardson and Morton, it is evident from the record that Governor Izard made a conscientious effort to effect an efficient administration of the territory's affairs.

His chance for a permanent place on the map of Nebraska was removed when the county originally named after him was named Stanton in honor of Lincoln's Secretary of War.

Dale Carnegie

A HALF CENTURY ago a magazine publisher got excited over the lack of enthusiasm of the employees he contacted. Most of them were dull, apathetic, did their work in a routine way. He knew that this was a common trait of workers, for he had checked on them for 20 years.

> He had learned, during these years, that those who had no enthusiasm stayed in the same groove, made little or no progress, remained pretty much at the same salary level, and changed jobs frequently.

He was so fired with indignation over this trait of the average man that he dashed off an article about it, dashed it off on the spur of the moment, at white heat. It struck home to thousands and thousands of readers, employers and employees alike.

Readers of his little magazine in which the article appeared sent for extra copies, dozens of them. Charles H. Daniels, general passenger agent of the New York Central railroad at the time, ordered thousands of copies for the employees of the railroad. Twenty years later, the publicity department, recalling the good that article had done, repeated that act.

From Russia came a big order, a copy for every soldier engaged in the war with Japan. Within a few years forty million copies had been printed. This article is called "A Message to Garcia." If you haven't read it, do so at once. No doubt your public library has it.

Now, check your associates. You will find that the man who has enthusiasm is forging ahead. He may not be vociferous, he may be a very quiet type of man; it isn't necessary for enthusiasm to make a noice. But if he hasn't enthusiasm, he will fall into a rut.

Next, check yourself. Do you want to remain all your life just where you are now? It's up to you! Just do good work, do what is expected of you, and you'll probably hold your job as long as you want it. But develop enthusiasm, do more than is expected of you, and the chances are that given time you will increase your income, your influence and power.

There's really so little enthusiasm extant that it gets a lot of appreciation. Now be careful. I don't mean noisy talk. I mean true enthusiasm, a real and true liking for your work.
