Senator Metzger Tells of Work of the Unicameral

(Continued from Page One)
carrying on the successful campaign for the restoration of the clock in the court house tower and for the great response of the residents to supply the funds.

Senator Metzger was presented by President Furse expressing the pleasure that all felt in his coming here to tell of the work of legislature.

Senator Metzger in opening stated that in this session he had found that there were eighteen of the older members absent by reason of the election, and the new members were of course not experienced. He also praised the work of the state safety patrol. The patrol had brought into the revenues \$50,000 in increased license fees for trucks and to the counties of the state \$125,000 in fines for highway violations. The cost of this department was very low and the men that served there were deserving of every commendation.

In touching on the expenditures, the speaker stated that the revenues were secured from a number of sources other than property tax, an immense amount of the funds was diverted to the use of the schools, cities and counties. He also touched on work of the state legislative council that had considered among other studies the matter of county consolidation in the smaller populated counties. The council had also considered and recommended the school reorganizing bill to relieve much of the congestion of the schools. One county, Kearney, had already showed a great deal of interest in getting plans ready, in Cass county there had been no active moves to take advantage of the proposed reorganizing. In the northeast section of the state the reorganizing had met some opposition.

The matter of salaries had been one of the big problems of the legislature. How to pay salaries that would attract well qualified people to public office. One case was cited, that where the county attorney of Douglas county had been increased to a figure larger than that of the attorney general, still not out of just reason. The salaries of the state auditor and state treasurer were also inadequate the speaker stated. In the health department the head of the department received less than many of the other employees. Senator Metzger stated the taxpayers league should realize that good and qualified people had to receive a living wage. The speaker pointed out that state official salaries were set on a basis of 1920.

The work of the lobby in the legislature was also touched upon by the speaker who cited instances of the activities, particularly of the Farm Bureau group, definitely against the road program, their activities misleading the farmers of the state.

The road program as proposed by Governor Peterson also was touched upon, the speaker pointing out that the governor had appointed a commission to check over the situation and

make reports to be presented to the unicameral. The study had revealed the increasing heavy trucks and their operation on the highways with the finding that the roads had suffered a great deal.

The road program was vigorously opposed by the Farm Bureau, oil people and the truckers. Increase in the gas tax and increased license fees had brought much opposition. In Nebraska the license fee of \$10 in pre-war days had been scaled down to \$3 and \$5. In Kansas, trucks were given a low license fee, but were charged a tax on their operation of tonnage, while in Nebraska the only cost was the gas tax and license fee.

One, if not the most pressing of the state problems, was that of the roads, which by reason of increasing weight of trucks and traffic and the very bad winter weather, had made the highways practically impassible. The graveled roads of the state were riddled by the hard water and heavy traffic, bituminous mat roads had been built to a two inch depth in the thirties, and these were all wiped out in the past winter and would have to be replaced.

Senator Metzger in discussing the sales tax pointed out that the fact that Nebraska had no sales tax, had, in a way, interfered with the moving of industrial plants here because of the fact that the taxation of the property was much higher than that in Iowa where the sales tax had relieved the property tax to a large extent. In this connection the senator criticized the one single tax system that had prevailed in the earlier days.

The question of the educational situation in the state was touched on in reply to questions from the members present. Mr. Metzger stated the desire of the state normal schools that now have the right to issue bachelor of art degrees in teaching, and now seek to have the right to issue these degrees in the fine arts. The speaker pointed out that in many states the higher educational schools were all under one head.

In reply to questions as to the sale tax, Senator Metzger pointed out that the property tax in Iowa had been \$136,000 the past year and in Nebraska, had been \$8,000,000, proving that the tax had served as a replacement. The senator stated that it was estimated that in Nebraska a two per cent tax would bring in \$20,000,000 a year to support the government costs. It was pointed out that in the operation of the sales tax the merchant was the tax collector and was allowed a small percentage for his services that resulted in a very fair return in the year.

Following the meeting the members of the group enjoyed an informal visit with the senator who later returned to Lincoln.

Child Welfare Meeting Thursday
The American Legion Auxiliary unit of this city is to hold their regular monthly meeting on Thursday at the club house on the curve and as a feature of the meeting there will be a very interesting discussion of child welfare in Nebraska and in each community of the state.

The Auxiliary meeting is inviting the members of the Legion and all those interested in the child welfare movement in this community. To bring added interest R. C. Blatt of Bellevue, the state chairman of the Legion departmental child welfare committee, will be here to discuss this question and also to show pictures taken over the state and showing the work that is being done at this time to aid the interests of the children. Mrs. Vesta Thomas, chaplain of the 8 and 40 of Nebraska, will also be here to talk on this important subject that is one of the chief aims of the 8 and 40.

Board Meeting of D. C. C. W. is Held
The board meeting of the Plattsmouth deamery of the D. C. C. W. was held on Tuesday, April 19, at 2 p. m. at the Grand Hotel in Nebraska City. Mrs. J. J. Cullen, Avoca, dean-

ery president, presided. Plans were made for the spring meeting of the deamery to be held at St. Joseph's church at Paul, Nebraska, Tuesday, April 26th, opening with mass at 8:15. Registration begins at 9:30.

PEOPLE KNOW
Butter
ON SIGHT BY ITS
YELLOW COLOR
LET'S KEEP IT THAT WAY!

EVERY effort should be made to maintain sound protection of the foods that go to the family table. This great nation was not built upon misrepresentation and imitation. It has grown great as the result of fair competition among products sold to the public for exactly what they are.

Today an effort is being made to confuse the situation by allowing another product to assume the golden yellow color that has become recognized as BUTTER'S trademark color. This would lead to confusion. It would encourage misrepresentation. It would be contrary to the public's best interest. ONLY BUTTER CAN BE BUTTER and no action should be taken that would permit misrepresentation through imitation. Through the years BUTTER has been made from GOLDEN CREAM—four pints to every pound...

AMERICA HAS ALWAYS BEEN A BUTTER COUNTRY!
BUTTER has been the nation's standard of good living. Let's keep it that way. No one likes to be fooled. Misrepresentation should not be allowed to happen to BUTTER through imitation of BUTTER'S yellow color. The public doesn't want it to happen. You don't want it to happen. That's why the dairy farmers of the nation make this proposal to free the public from oleomargarine taxes while at the same time protecting the public from fraud:

1. Remove all taxes and license fees on oleomargarine paid by the public and the food industry.
2. Prohibit the use of yellow color in the manufacture and sale of oleomargarine in imitation of BUTTER.

The Granger-Anderson Bill now before the Congress removes all taxes. It prohibits movement of oleomargarine colored yellow in imitation of BUTTER in interstate commerce. It permits each state to regulate within its own borders. To this extent it gives you the protection you have a right to expect when you buy BUTTER. You would pay no tax. Fraud would be prevented. This is a fair proposal in the public interest—your interest. You would get a choice between yellow BUTTER and products not colored in imitation of BUTTER.

ONLY BUTTER CAN BE BUTTER
BUTTER is America's symbol of good living. It's a natural product churned from pure cream. Into every pound of BUTTER goes the butterfat of four pints of cream. The golden glow and concentrated goodness of cream give BUTTER that natural delicious creamy flavor. As a spread, in cooking, for seasoning, there's nothing like BUTTER.

Seniors Receive Gift of Spoons
During the past week the seniors of the high school received silver spoons from chives jewelry store. Several weeks ago each of the seniors chose the pattern of the spoon which they wanted and the spoons were ordered at that time.

The chives have done many things for the school in the past. Last fall they presented the school with a new clock for the assembly.

The seniors appreciated this gift very much and they will treasure these spoons as souvenirs of their senior year in high school.

The handy Navy "ditty bar" was first called the "ditty bar" because it contained two of each item.
