Unto All Men

Lesson for January 29: Acts 10: 17-20, 24, 34-43  
Memory Selections: Matthew 28: 19-20

NOT ALL THE Roman soldiers in Palestine were pagans. A centurion in Caesarea had embraced the Jewish religion and he "prayed to God always." Obedient to the vision of an angel, he sent two of his household servants and a devout soldier to Joppa for Peter. When they arrived, Peter had just had the vision of the unclean beasts. While he pondered its meaning, the messengers inquired for him. Because of the vision's teaching and at the bidding of the Spirit, Peter went with the men to Caesarea. Arriving there, they found Cornelius, kin and friends awaiting him.

Declaring he perceived that "God is no respecter of persons," Peter preached unto them; the Holy Ghost fell on them, and they were baptized. Abiding with his converts certain days, Peter went to Jerusalem. There the mother church called upon him to give an account of his going unto Gentiles. When they heard of the gracious results, they glorified God, saying: "Then hath God also to the Gentiles granted repentance unto life." Thus the mother church reached the momentous decision to bear the Gospel to the Gentiles. We shall do well to learn the great truth that God calls none common or unclean, and realize that we should set no barriers against any group of men because of their race or their nation.

## LINES OF PROGRESS

High voltage power lines are rapidly stretching to new areas—big new generators are being installed—substations, transformers and other power supply facilities are being built and more are on the way in a vast electrical expansion program for which over \$23,000,000 has already been earmarked.

Men and machines are rapidly winning the battle to bring to Nebraska badly-needed additional electricity.

It's all a part of a new Coordinated Program in which all power agencies—Consumers Public Power District, the Nebraska Public Power System and the Rural Electrification Districts—have joined hands to most rapidly and economically meet Nebraska's expanding electrical needs, today and for the future.

It is truly a cooperative effort to most efficiently and economically achieve greater electrical advantages for farms, homes, communities and industry — to assure continued progress and new opportunities for all Nebraskans.
