

### Effectiveness Of Law Repeal Still In Doubt

Effective date of the repeal by referendum of the one cent added gasoline and the increased motor vehicle fees is considerably in doubt, according to Nebraska state house sources.

Attorney General C. S. Beck informed Clay Wright, chief of the motor fuels division of agriculture, that he was required to continue collecting the tax until a proclamation is issued by the governor announcing the two referred bills have been repealed by vote of the people.

The letter of the attorney general said that after the canvass of the state vote by the canvassing board the governor has 10 days in which to issue the proclamation in the same manner as on "presidential electors."

Deputy Attorney General Walter Nolte said he was not informed on the legal research made. He said he would confer with Beck.

An opinion has been given that the vote on elective state officers is to be tabulated by the canvassing board and delivered to the legislature for canvass. The opinion did not state whether presidential electors are similarly canvassed or not.

If a legislative canvass is re-

quired, the issuing of licenses for motor vehicles in 1951 will become quite a problem for county treasurers. Vehicle owners undoubtedly would wait until January when the lower fees would become effective to buy licenses. Licenses become due Jan. 1 and delinquent Feb. 1.

It has been to custom for many auto owners to make license applications in December.

Date of annulment of the one cent gasoline tax also will mean a loss of many thousands of dollars to highway improvement or savings of a similar amount to motorists, whichever way the taxpayer may consider it.

Nolte said that the office had not been requested to give an opinion on the effective date of the referendum proposals, and as a result no one had looked into the law except Beck in answer to another question.
