YOU CAN BE PROUD

—that one Nebraska county has more cattle than any other in America!

Cherry county, in the Nebraska sand hills, produces more cattle than any other county, anywhere! That, and the big cattle feeding operations in the corn sections of the state are two reasons why Nebraska is becoming known as the "T-Bone" state!

You can be proud, too, that your state rates high for other accomplishments. Nebraska is known for the fact that its tavern owners strive to conduct their places for the greatest public good. Nebraska taverns are known for their clean, wholesome atmosphere.

This can be largely attributed to the broad-gauge continuing educational program for retailers conducted by the brewing industry.

when PROTECTION counts

Sometimes people see the need for protection only when it's too late. Locking the barn door after the horse has been stolen is an age-old fable of futility.

All of us guard against dangers that appear imminent. Threat of flood drives us to building levees, piling sandbags. But too often the inevitable dangers that threaten our families' security are disregarded or forgotten.

For most of us the only real guarantee of the future security of our families is life insurance. Why not examine your own situation? Are your wife and children protected—or are you taking the risk of waiting until it's too late?
