Wilbur Shaw thinks so much of this new Chrysler, he has selected it as Pace Car for the 1951 Indianapolis 500-mile race.

WILBUR SHAW, AMERICA'S MOST FAMOUS DRIVER, DRIVES NEW 1951 CHRYSLER—REPORTS TO YOU ON REVOLUTIONARY FIREPOWER ENGINE AND HYDRAGUIDE POWER STEERING

Here are Wilbur Shaw's reactions—in his own words—as taken down by a recording machine in the car:

"The '51 Chrysler has it! With this new engine and power steering, the first on any U.S. car, it's a whale of an automobile.

"I'm completely bowled over by the ease of steering!

"This steering combined with the automatic trans-

mission . . . is the nearest thing to an automatic pilot for a car I can possibly imagine.

"This engine . . . I can't get over the amount of power and snap in this engine . . . it's incredible!

"I drove 111 miles with the feeling I had expended no more effort than in driving around the block.

"When Mrs. Shaw drove, her comments just about squared with mine. Here's what she thinks of the 1951 Chrysler . . ."

Mrs. Shaw: "At first I could hardly believe the ease with which I could turn the wheel. That's important . . . especially in the summertime.

"Often after I have parked a car in the average parking space, I feel I should taxi home, shower and get dressed again. But with Hydraguide Power Steering I parked it with one hand. It practically drives itself."

Wilbur Shaw: "It's hard to describe this new Chrysler without going off the deep end . . . it has it in every department.

"In fact, I think so much of this car, I've selected it as Pace Car of the 1951 Indianapolis 500-mile race!" (Mr. Shaw's comments are reprinted through the courtesy of Popular Science Magazine.)

*Mr. Shaw refers of course to standard passenger cars—not racing cars or special models.
