

Ad Club Hears Chamber Plans; Toyland Slated

Walter H. Smith and Orville Nielsen, president and treasurer of the Plattsmouth Chamber of Commerce, Wednesday noon explained the groups plans for a permanent secretary and active Chamber to members of the Plattsmouth Business Men's Ad Club.

Special guests at the groups regular meeting, the Chamber officials gave a brief rundown of recent board meetings held to determine the status of the Plattsmouth Chamber. Following an explanation of the Chamber's plans, Smith and Nielsen answered questions of the Ad Club members.

Ad Club members also had several items of business to dispose of during their two hour session. The group was primarily concerned with its Christmas program.

Club members learned that arrangements have been completed for using the building formerly occupied by Dr. Louis Amato for Santa's Toyland. Arrangements were completed with R. R. Furse, owner of the building.

In connection with Toyland, Ad Club members learned that Santa has scheduled an eight-day stop here before Christmas. Jolly Old St. Nick has slated a December 15 appearance, and will remain here until December 22.

The business men also voted to remain open evenings until nine o'clock for a nine-day period. Stores will remain open until 9 p.m. from Dec. 14 until December 22. All stores will close at six o'clock Christmas Eve.

Ad Club members voted to make Christmas, the group will sponsor a free bride December 14 and December 19.

Satisfied with the results of their special Halloween party, held in connection with a special street lighting program, Ad Club members voted to make the Halloween party an annual affair. The group also learned that approximately 1,500 people were served at the pancake feed during the October 31 observance.

More than 5,000 cars have used the Ad Clubs free bridge program since April 1, members learned. During the 33-week period, 5,399 cars used the free bridge privilege, for an average of 163.3 cars each Saturday.

Two cars were slightly damaged in an accident on 6th street here Friday evening. Cars damaged were those of Harold Lebens of Plattsmouth and Dr. R. W. Tyson of Murray.

Deputy Sheriff Kenneth Dunlap's report said the two cars collided as Lebens was driving his car south on 6th and Tyson attempted to pull away from the curb. Tyson told Dunlap he did not see the approaching auto.

The Lebens' vehicle received damage to the right front fender, rear right fender and right side estimated at \$75. The front bumper and left fender of the Tyson car was damaged.

Mrs. Gilmore, 73, Native Of Cass County, Dies

Mrs. George H. Gilmore of Murray, prominent resident of the Rock Bluff and Murray communities for many years, died at her home in Murray Wednesday, November 14, 1951. She was 73 years old.

She died suddenly at her home, although she had not been in the best of health of recent years. She was the wife of Dr. G. H. Gilmore, prominent Cass county historian.

Born January 2, 1878, on a farm south of Murray, she was the daughter of James A. and Margaret Walker, pioneer residents of Cass county.

She was married to Dr. G. H. Gilmore, prominent Cass county historian. Born January 2, 1878, on a farm south of Murray, she was the daughter of James A. and Margaret Walker, pioneer residents of Cass county.

Ruffner Well Is Down 97 Feet; Drilling Resumes

Drilling started in earnest this afternoon on the Ruffner Well No. 1, on the Edwin J. Ruffner farm, three miles southwest of Murray.

After reaching a depth of 97 feet Wednesday, surface pipes were set and cemented in preparation for 24-hour a day drillings operations. The Halliburton Oil Well Cement Company of Duncan, Oklahoma, cemented the surface pipes after the drillers had reached solid rock.

The test well is being drilled by the General Drilling Company owned by Cal and Chas. Steele of Crete, and is financed by the Cass Oil Research Trust.

Roy Knorr, secretary-treasurer of the Trust, said today that drilling has been progressing on schedule and that 24-hour drilling would start Thursday afternoon.

The test well, first of many to be made in this area by the Oil Research Trust, reached the 97-foot mark Wednesday after drilling operations started early this week. The drillers had to go to solid rock before the surface were set up on the site Sunday, pipes could be laid. Derrick and drilling operations started Tuesday.

Plans are to continue drilling to granite unless an oil strike is recorded before that. Bernard Long of the Long Geophysical Company of Oklahoma City, is logging the well.

Council Approves Meter Ordinance; Installation Starts

The City Council Monday night approved an ordinance providing for location of parking meters through the main business district of Plattsmouth. The ordinance was passed by a unanimous vote.

The ordinance, as drawn up by City Attorney Harold Lebens, provides that parking meters shall be installed on Main street from Richey street to 7th street; on Sixth street from Avenue A to First Avenue; and one-half block north and south of Main street on both 4th and 5th streets.

The ordinance also establishes times for which motorists must pay to park in the metered districts. Motorists will feed the parking meters from 8 a.m. to 6 p.m., Monday through Friday, and from 8 a.m. until 9 p.m. Saturday. Sundays and holidays are exempted.

Provisions in the ordinance also call for 12 minute, one hour and two hour parking fees. The basic will be one penny for each 12 minutes.

Violators of the parking meters will be subject to a fine up to \$1, if paid within 24 hours of the time a police officer's notice is attached to the vehicle. A full account of the ordinance provisions will be found on page 5 of this issue of the Journal, Section B.

While the council was in session Monday night, representatives of the Dual Meter Corporation appeared and told councilmen they were ready to install the meters. Although unprepared at the time, councilmen got together Tuesday morning to determine placement of the meters.

Since noon Tuesday, the two company employees have nearly completed installation of the meter posts. Meters have not yet arrived in Plattsmouth. Dick March, who was appointed a special policeman by the council Monday, and who will return from a technical school in Ohio Sunday, will help the company men install the meters. March will also be in charge of collections and maintenance.

Meanwhile the new traffic control lights, corner of 6th and Main, are up and will be ready for operation soon. Ray Hold is installing the control lights. At its Monday meeting, the council passed a resolution providing for installation of the traffic control lights and the automatic school stop lights on Chicago and Washington Avenues.

City policemen, who are charged with patrolling the metered area, and who will give tickets to violators, will probably take it easy on motorists for a time after the two new services are in operation.

Discussion of the council meeting indicated that city policemen will issue warnings for a period of time, before actually clamping down. But once the warning period has expired, violators will be subject to tickets and fines.

Reversal from the parking meters will go into a special fund, which will be used for paying the cost of the meters, maintenance, and salary for the special police officers charged with maintenance and collection. Half of the take will go to the meter company and half to the city. The meters are paid for by the city.

In determining the placement of the meters, city policemen set on a 20-foot wide diagonal parking stalls in the width of the stalls. Adequate door room for access to automobiles.

Armistice Day Is Observed In Local Schools

In observance of Armistice Day, special services were held at each of the Plattsmouth schools Monday afternoon. Activities included speeches by local citizens, sounding of taps and retreat by high school musicians, and repeating of the salute to the flag.

Taps were sounded in all school buildings at 11 o'clock Monday morning, followed by teachers and pupils standing at attention for two minutes. Retreat was then sounded.

Speakers and buglers at each of the schools were:

High school—Richard C. Peck, speaker; Jon Schuetz, bugler.

Central—Howard Hinz, speaker; Ronald Schneider, bugler.

Columbian—Miss Mildred Hall, speaker; Barbara Akhre, bugler.

Wintersteen—Miss Ida Patton, speaker; Harold Demaree, bugler.

First Ward—Mrs. Ray Larson, speaker; Douglas Reno, bugler.

St. John's—C. C. Girardot, speaker; Harold Wagner, bugler.

High school—Richard C. Peck, speaker; Jon Schuetz, bugler.

Central—Howard Hinz, speaker; Ronald Schneider, bugler.

Columbian—Miss Mildred Hall, speaker; Barbara Akhre, bugler.

Wintersteen—Miss Ida Patton, speaker; Harold Demaree, bugler.

Street Paving Payments Made; Fines Bring \$460

The City Council Monday night approved payments in the total amount of more than \$23,000 on three paving projects to the National Construction Company of Omaha.

Payments in the amount of \$5,899.86 on street improvement district 100; \$14,534.51 on improvement district 101; and \$3,053.80 on street improvement district 102 were approved.

On the same three districts the council also approved payment to Henningsen Engineers for \$585.96.

Other road problems were also aired at the council meeting. Alvin Reed, regular fan of the council in recent weeks, again asked that something be done about the road in front of his house at 618 Avenue F. He has agreed to share the cost of filling in low spots, and told the council he plans to rock the road if such improvements are made.

In other action Monday night, councilmen accepted the police magistrate's report for the past three weeks. The report showed a total of \$460 collected in fines and fees.

Boat And Motor Are Recovered

The boat, motor, oars and gas stolen from the Joe Bulin cabin here several weeks ago, was discovered near Brownville Tuesday, Sheriff Tom Solomon reports.

Solomon said it was discovered hidden at the end of a dike line under drift wood by F. P. Oldfield of Brownville. The boat was partly filled with water.

Solomon said the motor was returned Tuesday to Bulin, who went after the other equipment Wednesday. Bulin, who lives at Omaha, had been renting the cabin.
