

**ENROLL IN A 4-H CLUB**

Tear this out and send to your County Extension Agent.

Dear County Extension Agent:

I would like to become a 4-H Club Member

My Name is.....

My parents' name.....

Our Address is.....

I am interested in.....

Age..... Signed:.....

Future 4-H Club Member

### 4-H Club Offers Youth Knowledge and Experience

With the appointment of two Cass county 4-H club members to attend the National 4-H Club Congress at Chicago later this month, now is a good time for other youngsters in the county to check on the benefits which such a program has to offer them.

Misses Peggy Sand and Marjorie Whipple of Nehawka, two prominent Cass county 4-H clubbers will depart soon to attend the annual session in Chicago.

But several hundred Cass county youngsters are eligible for membership in a 4-H club. They, too, may someday receive a similar honor. In addition they gain from experience and trained leadership vast knowledge of a selected trade, plus training in leadership, teamwork and cooperation.

Fill in the enclosed blank and mail to County Agent Clarence Schmadeke for enrolling in a 4-H club.

### New State Highway Map Is Available

State Engineer Harold L. Aitken announced Tuesday that the State Highway Department has a new official map of Nebraska highways available for distribution. The department has been waiting for delivery of the maps from the printer for almost four months.

The state engineer said that the lines on the map show only relocations, additions to the highway system and changes from gravel to a higher type of surfacing and yet the map reveals improvements in 63 of Nebraska's 93 counties since the last map was issued July 1, 1949. He explained that the map does not show such improvements as new bridges, highways that were regarded on old alignments, highways that were widened or highways that were resurfaced. Aitken said that the high rate of improvement indicated on the map was due to the increased revenue measures passed by the 1949 Legislature; and since those measures were repealed by referendum in 1950 that a new map in 1953 would show a lower rate of improvement.

The earliest state editorial association was organized in Wisconsin in 1853.

### Care Is Answer To Cornpicker Accidents

Jack Steele, extension engineer at the University of Nebraska, warns farmers to take extra care to avoid accidents when working with cornpickers.

Although repeated warnings have been issued this fall, Mr. Steele says that reports of cornpicker accidents are heard almost daily.

The extension engineer said that some of the precautions that should be taken are: Always stop the machine when cleaning it out, never try to pull stalks out of the picker when the machine is in motion; be extra careful when working around a cornpicker early in the morning or late at night; make sure the machine is in proper adjustment so there is minimum clogging.

Mr. Steele said that most accidents happen between 10 and 12 a. m. and 4 to 6 p. m. This is true because the operator is often tired during these periods of the day.

"The old Swedish custom of having coffee in the middle of the morning and the middle of the afternoon is a good thing," he said, "because it makes us more alert."

### "BLOOD RUN" HEAVY

Ofutt's "Blood Run" has been highly successful up to this point. If the men continue to donate blood at the same rate they will exceed their quota about 60 pints a month, according to Mr. LeRoy Roberson, administrator for the Nebraska-Iowa Regional Blood Program.

### Fine Lime Best For Acid Soils

There is no basis for the belief that coarse limestone is better than fine lime for neutralizing acid soils, according to Extension Soils Specialist Wilber E. Ringler of the University of Nebraska.

Tests, he said, show that limestone which is ground fine enough to pass through a sieve of 50 meshes per inch is 10 times as effective as coarse lime particles the size of wheat grains.

An experiment at the university's agronomy farm in 1929

showed that where fine dust lime was used the alfalfa yielded three-quarters of a ton more per acre than where lime was not used. Sweet clover seeded in 1950 on the plot which had received the lime was 50 to 100 per cent better than sweet clover on the land which had no lime.

That shows, says Mr. Ringler, that lime will last a long time.

ONE MINK WAS MEAN CHICAGO — Vincent Colletti, a 26-year-old freight handler, couldn't figure out why anyone would ship one mink in a case of its own while three other

cases in the shipment had about 16 minks each. He lifted the case with the lone mink and soon found the answer. Doctors said his bitten hand was not serious.

The Associated Press first used typewriters in 1885.
