

OUR CHURCHES

CHRISTIAN SCIENCE SERVICES

"God" is the subject of the Lesson-Sermon which will be read in Christian Science churches throughout the world on Sunday, January 6, 1952. The Golden Text is: "As for God, it was I myself." (II Samuel 22:31). Other Bible citations include: "And I heard a loud voice saying in heaven, Now is come salvation, and strength, and the kingdom of our God, and the power of his Christ." (Revelation 12:10). The Lesson-Sermon also includes the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures" by Mary Baker Eddy: "Spirit blesses man, but man cannot tell whence it cometh. By it the sick are healed, the sorrowing are comforted, and the sinning are reformed. These are the effects of one universal God, the invisible good dwelling in eternal Science." (Page 73).

TRACTOR SPEED

is always Just Right!

... with the new Ford Tractor and

PROOF-METER

Every implement works best, stands up longest, if operated within a recommended speed range. Take a planter for example, if you operate a planter too fast you not only shorten its life, but you get poor planting. You're likely to get "misses" that cut down yields and reduce profits. But if you operate too slow you'll waste time and lose profits too. For best results in planting, and in most all other field operations, right tractor speed is important!

The Proof-Meter—found only on the new Ford Tractor—enables you to hit and hold the right speed for planting and many other jobs, because it shows exact travel speed—in every gear—right before your eyes! And Proof-Meter does more...

5 Instruments in ONE! In addition to Tractor Speed, the Proof-Meter shows you Engine Speed, Power Take-Off Speed, Belt Pulley Speed, and indicates Hours Worked. Nothing else like it.

Only the Ford Tractor has the Proof-Meter!

SEE FOR YOURSELF! Let us show you, right on your own farm, the dozens of ways in which the versatile Ford Tractor and Dearborn Farm Equipment can help you cut costs, get better results, and help make more money for you.

FIRST CHRISTIAN CHURCH

George L. Smith, Pastor
Sunday—9:45 a. m. Sunday school.

NEW CIRCULAR ON WEBWORM IS OUT

A new circular on garden webworm damage in alfalfa is off the press at the University of Nebraska and is available at the offices of county extension agents.
Extension Entomologist R. W. Helm, author of the publication, presents the nature of the webworm and the latest information for the pest's control.
He points out there usually are four broods of the webworm in woody areas and does little crop damage. The second brood normally appears during the last two weeks in July and the third brood appears during the last two weeks of August. The second and third broods cause the damage in the second and third crops of alfalfa. The fourth brood often causes some damage to newly seeded alfalfa and then goes into the ground to overwinter.
The type of control, he says, depends on the growth stage of the alfalfa and what the farmer wants to do with the legume. The control measures are outlined in the circular. Ask your county agent for Extension Circular 1563.
