BEFORE YOU INVEST IN ANY FINE CAR... COME DRIVE THIS

# CHRYSLER V.8 ENGINE!

Whether you plan to buy a Chrysler or not, we cordially invite you to drive this revolutionary Chrysler FirePower V-8 engine. Only FirePower performance can possibly tell you what it is like. We want you to have that experience. The FirePower engine is a basic new design so advanced it can meet rising performance needs for years to come. Today it delivers 180 horsepower, even on non-premium fuel, and when desirable with

simple changes in manifolding, compression, and carburetion the horsepower can be raised to 250 . . . or over 300, as in the experimental Chrysler K-310 car. Naturally, others will imitate this Chrysler achievement, at least in part. We honestly believe that the Fire-Power engine will outperform any other car in America . . . and we invite you to learn the new standard in engine performance Chrysler has set by driving it yourself.

DRIVE a Chrysler and LEARN the difference
