CHRYSLER FirePower
is so much more than HORSEPOWER

- + It's worth remembering that today's Chrysler V-8 is not a "warmed-over" engine, but basically brand new... the first truly new type engine of modern times. It does, indeed, open new horsepower potentials, but what it can mean to you goes way beyond just that...
- + FirePower is also a better-built engine throughout. It doesn't require premium fuel. It runs with less waste, less heat, less wear, less carbon deposit than other type engines can do. More of your gasoline's energy is turned into actual road power, greater reserve for passing and top speeds when needed...
- + FirePower gives your gasoline a better place to work... the first hemispherical combustion chamber in a stock-car engine. It makes possible more power from every drop of gas.
- + You feel it the minute you open up a Chrysler, in greater accelerating power than you've ever had at your command...
- + Why not drive this revolutionary new-type engine, and feel its wonderful difference for yourself? Let your Chrysler dealer show you how much more than horsepower your money can buy in the engine Chrysler has designed from scratch to do an engine's job better, longer, and more efficiently than previous engines can hope to do!
