# 1953

and an even brighter *Electrical* future for you and your community!

As we stand on the threshold of the New Year, it is with a feeling of satisfaction that we review our accomplishments of the past year. Tremendous progress was made in 1952 in expanding our facilities to keep ahead of the rapidly increasing electrical demands of modern living.

What about 1953? Plans are already completed and budgets approved to continue our vast program of construction to provide for additional power sources, new transmission and distribution systems, new substations, and rebuilding and revamping of existing facilities and equipment to accommodate new and heavier electrical loads.

Yes, 1953 is going to be a big year for you and for us, electrically speaking, as the work goes ahead to assure you, and your community, of an even brighter, electrical future!

Look for this symbol of the PROGRESSIVE, DEPENDABLE ELECTRIC SERVICE! It represents good electric service to over 350 Nebraska Cities, Towns and Villages!
