POAST-TO-COAST IN 4 HOURS

An American airline official recently predicted U. S. jet passenger aircraft girls. would be spanning the country, coast to coast, on a four or five hour schedule, in a comparatively short time. It was admitted that the British at present hold the lead in the production of jet passenger aircraft, although the official believed U. S. industry could eatch up by 1960.

It was indicated that some of the companies now building jet bombers for the Air Force might be able to convert the bombers into passenger craft by using plans and specifications and experience gained in building military craft. When such planes are put into operation, it is likely that they will carry passenger loads in excess of the 55-passenger load of British Comet jets-the only passenger jet now operating on scheduled runs.

When U. S. jet airliners go into operation, they will probably cross from coast to coast in about four hours. It will be possible for a passenger to leave New York at the end of a business day and arrive in San Francisco in ample time to spend the night on the West Coast. For example, if he left New York at five o'clock, he could dine on the plane and be on the ground in San Francisco between nine and ten o'clock, New York time. The same sort of schedule would apply to an Atlantic Ocean crossing, such as a trip between New York and London.

This sort of service is expected to be available by 1960, or earlier.

PRIZE FIGHT NOTE

A We are inclined to agree with Joe Louis, that whatever the cause of the recent heavyweight fiasco in Chicago, it did boxing no good. We would add here that the boxing "game" is in sore need just now of good publicity, not bad.

Our own suspicion is that Jersey Joe Walcott was a bit more dazed than would appear, or that his reflexes were not as quick to respond as he assumed. Whatever the case, Jersey Joe did not arise at the count of ten and was counted out. It is true, that some referees would have allowed him to go on, but the rules are on the side of the heavyweight champion and the referee who counted Joe out.

Now that Champion Rocky Marciano is solidly on his throne, we suggest that he defend his title reasonably often.

Since Marciano has not yet had a fight this year, we think he should defend his

by BERNIE CAMP Information Director Nebraska Farm Bureau Federation How the Two-Price System

Works This is how the two-price system of farm price support proposed by J. T. Sanders, legislative counsel of the National Grange, would operate.

As he explains it, the farmer with 1,000 bushels of wheat to sell takes it to the elevator. USDA a encies have previously determined that 80 percent of the crop will go to primary use and 20 percent to secondary use. rity price has been set at The market price is then ligured at 80 percent of parity or \$2.00 a bushel. The producer receives \$2,000 in cash for his wheat. The levator operator goes to the bank and buys "parity support and parity payment certificates" to a value of 50 cents on the bushel. He then removed the parity payment portion of the certificate on that part of the wheat going to the primary market (a value of \$400) and gives it to the producer who may cash it immedately or hold it up to 6 months secondary marketing may move to an exporter who buys at \$2.00 price, and turns in the parity payment certificates on it, reeiving an additional \$100. The primary market wheat moves eventually to a miller (proces-

sor) who pays the market price and buys this certificate and pass it along when he sold the wheat. The processor passes along the certificate cost to the ultimate consumer by incorporating it on a pro-rata basis in the price of his product.

In the case of meat, a surplus food distribution plan would be of heirship, and distribution of set up, with meat stamps distributed to needy families through local relief agencies. These families would use these stamps in purchasing meat they would not otherwise use. This stamp program would be financed in the Sanders plan out of funds received from the "par ity payment certificates" and and which ordinarily would finance support of the secondary mar-

title in 1953. Thereafter, we think the champion should give at least two challengers a year a crack at the title as long as he is champion. Joe Louis often met fighters at a much faster rate than this and seemed to thrive on the process.

The boxing "game" certainly needs a shot in the arm today and the colorful Marciano-by giving worthy challengers their deserved chance-can do much for the sport. One heavyweight championship fight a year is not enough.

OOK HERE IKE

The Government Accounting Office recently reported that the purchase of two baffle plates for \$2.97 by the New York Post Office was listed and documented by nine papers, bearing twenty-four signatures or initials, and twenty datings, and that the documentation took four months to process.

This is but one of the typical examples of Bureaucracy, which closely resembles what old soldiers refer to as Army red tape. We do not know the perfect solution to end this ridiculous business. The only thing we can do is to point out this one example in the hope that it will disgust the right people as much as it disgusts us.
