Out-Of-Towners Here For Funeral

Out of towners here for final rites for Mrs. John L. Smith are Chester B. Smith of Los Angeles; W. H. Henderson and family of Lexington, Mo.; Thomas Henderson and family of Lincoln; Mr. and Mrs. H. Smith of Lincoln; Mr. and Mrs. S. Ray Smith of Hartington; Mrs. Leora Henderson of Alton, Iowa; Mr. and Mrs. James Shanahan and Mrs. Mary Smith of Omaha.

Among the out of towners here for funeral services for Wm. Halmes were Mrs. G. L. Thompson, Mr. and Mrs. J. D. Josey of Sioux City, Iowa; Ted Stoehr of Odessa, Texas; Miss Naomi Bierman of Carbondale, Kansas; Louis Kracl and family of Cedar Bluffs; and many friends from Omaha.

Talk of the Town

Ronald Daniels was a week end guest at the home of Mr. and Mrs. Frank Kennedy in Guthrie, Oklahoma. He attended the 8th grade graduating exercises of Miss Wilma Wilson.

Sgt. Norman Ashbaugh, who is with the armed forces in Cheyenne, Wyoming, arrived home Sunday for a 30-day leave with his parents, Mr. and Mrs. Darl Ashbaugh.

Henry Schneider is in St. Joseph's hospital for observation and treatment.

Mr. and Mrs. Bill Williamson were guests of relatives in Seward Sunday.

Mrs. L. H. Hurst returned home Friday from Clarkson hospital.

Guests Sunday of Nellie Shea and Ila Kirker, were Mr. and Mrs. Ernest Kirker and Joey of Hooper, Mr. and Mrs. Eldon Welch and children of Denver, Colorado, Mr. and Mrs. Charles Long and Nancy of Pacific Junction, Iowa.

Mr. and Mrs. Roy Cunningham and daughter Jean of Sioux City, Iowa, spent the week end at the Glen Daniels home.

Russell Daniels was honored on his 9th birthday at a party Saturday at his home. There were 10 boys present to help celebrate the occasion.

Darrell Williamson, student at the State Teachers College in Maryville, Mo., was a week end guest of his parents, Mr. and Mrs. Bill Williamson.

Attending the District 6 VFW Encampment in Falls City Sunday were Mr. and Mrs. Dale Bowman, Mr. and Mrs. Lloyd Fitch, Edgar Kief, Mrs. Hazel Fitch, Mrs. Sophia Wolover and Mrs. Don Warga.

Mr. and Mrs. Ralph Morris and family of Colorado Springs, Colorado, are guests at the Rev. Roy P. Morris home.

B. L. Philpot of Weeping Water was a business caller here Friday.

Mrs. Henry F. Lutz, who has been in a hospital in Omaha is recuperating at home.

Glen Miller who has been sick the past week, has returned to work at the meat department in Soennichsens.

Guests for a few days at the home of Mr. and Mrs. John Bauer, Jr., was Mrs. Lurie Love and son of Lincoln.

Guests of friends here Friday were Mr. and Mrs. Dallas Boshear of Omaha. Mr. Boshear will leave Tuesday for Westover Field, Mass., en route to Greenland where he will be employed.

James and Edward Rebal who were called here by the death of their father, James Rebal, returned Saturday by plane to their home in Verdugo City, California.

Mr. and Mrs. Jack Gilman of Nebraska City were visiting friends here Friday night.

Dick Back who attends school in Omaha was a guest of his parents, Mr. and Mrs. A. E. Back over the week end.

Mrs. Edith Couch, who was called here by the death of her father, James Rebal, will leave Tuesday for St. Louis. Her mother, Mrs. James Rebal, will accompany her home.

Mr. and Mrs. Dennis Smith and son left Friday for a visit with Mr. and Mrs. M. D. Smith in Uvalde, Texas.

--- Extension --- Notes

Feed Soil Organisms
Feed the billions of hidden workers in the soil and they will give bigger crop yields and put the land in better condition.

Dr. George N. Hoffer, Lafayette, Ind., agronomist, points out that a single ounce of fertile soil contains as many as 30 billion tiny living organisms.

These microscopic workers provide nutrients for growing crops. They build tilth, fight plant diseases, fix nitrogen in the soil, rot organic matter and release carbon dioxide needed for crop growth.

But this hidden army of workers must be well fed to work efficiently.

Hoffer suggests these steps for increasing the soil's population of organisms and building their efficiency:

Supply plenty of active organic matter. It is estimated that the organisms in the plow layer of an acre of soil will use each year about 400 pounds of nitrogen, 80 pounds of phosphate and huge amounts of energy foods such as sugars and starches. A good stand of well fertilized sweet clover, red clover or alfalfa plowed under can supply about three tons of dry organic matter per acre. About half of this is nitrogen, sugars, starches and other materials the organisms need.

Add lime to acid soils. Organisms most beneficial to crops thrive best on properly limed soils.

Use plenty of fertilizer. Have the soil tested and supply the nutrients that are lacking. Generally speaking, it is advisable to use extra nitrogen for a better balance when plowing down cornstalks and straw.

Drain land properly. This allows the soil to warm up faster in the spring and allows better circulation of air.

Electrical Cord Care

Homemakers who are safety-minded will make their electrical cords last long and will minimize the danger of accidents caused by faulty connections or broken wiring.

There are three types of cords used for connecting electrical appliances in the home: lamp cords, heater cords, and special heavy-duty cords.

Lamp cords, intended for use on lamps, clocks, radios, fans, and the like, are insulated with silk, rubber, or a plastic material called flamenol. They should never be painted, tacked to the wall or run under rugs and table legs.

Electricity for coffeemakers, toasters, grills and irons, is supplied through heater cords made of fine copper strands covered with thin layers of rubber and asbestos, and held together by cotton braid. They should always be kept dry and free of kinks.

Special heavy-duty cords are designed for washing machines and vacuum cleaners. Although these cords are made of extra heavy rubber and built for long wear, they should not be used to pull the appliances around.

Treat Tomatoes at Planting Time
Tomatoes should be either dipped or sprayed with one of the copper sprays at planting time. The spraying will help prevent leaf spot. Weather conditions this spring have been favorable for the development of the disease.

If tomatoes were not sprayed at planting time, I suggest spraying the plants thoroughly at once. Tomato leaf spot can be kept under control if the plants are sprayed with one of

the copper sprays every 10 to 14 days.

Even though this may cause a lot of work and spending of considerable amount of time, "lots of home grown tomatoes are worth it."

Asparagus
Asparagus from near-by farms is now on the market, and prices are very much lower.

With continued warm weather it should not be long before asparagus is plentiful enough and cheap enough to justify home canning and freezing.

Asparagus can make valuable contributions to the diet. It contains significant amounts of Vitamin A and Vitamin C, some of the B vitamins and iron. Green asparagus contains more Vitamin C, and iron than the white bleached asparagus.

Fresh asparagus is usually sold by the bunch, but it is also sold unbleached, by weight. The important thing to remember when buying asparagus is that it must be fresh.

Asparagus ages rapidly after it is cut, the tips spread and the stalks become tough and woody.

There is a trick to cooking asparagus so the stalks are tender and the tips not overcooked. One way is to tie the stalks together and stand the min boiling water that just reaches the tips. Cook them for about 10 minutes, then cover the saucepan and let the tips cook in steam, or lay the bunch on its side until the tips are tender.

In cooking cut pieces, lay the tips on top of the stalk pieces

and use just enough water to cover the stalks, letting the tips cook in steam. Or cook the stalk pieces for about 10 minutes, then add the tips for the last 5 minutes or so of cooking.

Boys and girls, 8 years of age and older may be interested in doing some special project during the summer months. What can be more vital to the youth of today in preparing him for better citizenship of tomorrow, than the maintenance of physical, mental and spiritual growth?

The ten 4-H Guide Posts are:

1. Developing talents for greater usefulness.
2. Joining with friends for work, fun, and fellowship.
3. Learning to live in a changing world.
4. Choosing a way to earn a living.
5. Producing food and fiber for home and market.
6. Creating better homes for better living.
7. Conserving nature's resources for security and happiness.
8. Building health for a strong America.
9. Sharing responsibilities for community improvement.
10. Serving as citizens in maintaining world peace.

Individual members are encouraged to do something definite on some of the guide posts each year. Over a period of years, members who have been conscientious will have contributed in some way to all of the ten guide posts.

Alvo Minister Three Years Gets Bachelor Degree

Leslie E. Drake, son of Mr. and Mrs. Eldon K. Drake of Lincoln, was among the 106 Nebraska Wesleyan University seniors receiving degrees at 64th annual commencement exercises at Nebraska Wesleyan University Tuesday, May 26.

Drake received the Bachelor of Arts Degree with a major in humanities.

A graduate of the Grand Island high school with the class of 1945, Drake has served as pastor at Alvo for the past three years while attending Nebraska Wesleyan.

President Fred G. Holloway addressed the Wesleyan graduating class on the subject, "Today is the Day," and Chancellor Carl C. Bracy conferred degrees on the 106 seniors and two recipients of honorary degrees.

Drake plans to enroll at Iliff School of Theology in Denver, Colorado, next fall.

Thin-Shelled Eggs Are Problem; Need Oyster Shell

"What makes egg shells so thin?" is a common question asked by egg producers during the late spring and summer.

Drake received the Bachelor of Arts Degree with a major in humanities.

A graduate of the Grand Island high school with the class of 1945, Drake has served as pastor at Alvo for the past three years while attending Nebraska Wesleyan.

President Fred G. Holloway addressed the Wesleyan graduating class on the subject, "Today is the Day," and Chancellor Carl C. Bracy conferred degrees on the 106 seniors and two recipients of honorary degrees.

Drake plans to enroll at Iliff School of Theology in Denver, Colorado, next fall.

Drake received the Bachelor of Arts Degree with a major in humanities.

J. H. Claybaugh, extension poultry specialist at the University of Nebraska says that weak-shelled eggs often result whenever the sneei making department of the hen does not keep up with the demand for egg shells.

He says that when weak-shelled eggs become a problem, the recommended procedure is to make sure that an adequate supply of oyster shell or ground limestone is available and then increase the amount of vitamin D in the ration. The vitamin D should be doubled until the shell texture is normal.

The poultry specialist says that weak textured shells do not qualify for grade A quality, and that such eggs are often responsible for egg breakage and

smear eggs in the nest. The length of time a hen has laid and the speed of production can also affect her rate of assimilation and metabolism of calcium and phosphorus — both vitally needed in the production of egg shells. Claybaugh says that hens do not store up calcium in their bodies for use at some future time, and that the oyster shell or ground limestone a hen eats one day is part of the egg shell the next day.
