## PRIZE WINNING YIELD IN EVERY FIELD!

In 1952 Malvin Wiles, o near South Bend, harvested 824 bu. of corn from 8 1/2 acres, planted to Pool's Nebr. 601. This corn was cribbed separately, placed under government seal, and weights were checked.

This yield of 97 bu. per acre was made under average field conditions, and not on a selected contest plot.

We have other, new, State Certified varieties, from 100 to 120 day maturity. Many farmers were highly pleased with results from Pool's hybrids in 1953.

For more corn in 1954, when acreages are reduced, plant some of Pool's Nebr. Certified Hybrids. Still a good selection of most grades and varieties. Write for catalogue or see your nearest dealer.
