This year there will be an estimated 530,000 new cancer cases in the U. S., the American Cancer Society estimates.

Treat oats and barley seed before planting. Seed treatment will control such seed-borne diseases as smut and scab. Also, it will protect the seed from seed-decaying and seedling-blight organisms that may be in the soil. Recommended compounds for treatment are Ceresan M, Panoge, Agrox and Gy-trete. Treat at least two days prior to planting, preferable one week.
