**GUIDED-MISSILE WARSHIPS**  
The U. S. Navy expects to have the first of two guided-missile-firing cruisers ready for anti-aircraft duty in July of this year and the second later in the year. Completion of the project to convert the heavy cruisers, Boston and Canberra, presumably will make the American fleet the first of any world power to possess guided missile ships.

**ANTARCTICA**  
The U. S. S. Atka's trip to exploration in Antarctica confirmed that the area, which was used by the Germans in World War II, could not be ignored as a defense factor in the event of any future war.
