Heart Disease Is Battle for Everyone

Every resident of Cass county can help protect his own heart and cut the high death toll from heart disease.

The Nebraska Heart Association says: "One of the surest means for reducing this excessive death toll from heart disease as well as affording a longer, happier life is for the layman to follow seven rules."

1. Avoid self diagnosis.
2. Avoid overexertion.
3. Avoid over fatigue.
4. Avoid overweight.
5. Treat respiratory infections promptly.
6. Avoid worry and mental strain.
7. Support your heart association.

The Nebraska Heart Association points out that heart and blood vessel disease continue to take more lives in America than all other causes combined.

According to the latest figures available, there were 794,120 deaths from heart and blood vessel diseases in 1953, constituting 52.3 per cent of deaths from all causes.

The next four leading causes—cancer, accidents, pneumonia and diabetes—accounted together for only 26.3 per cent of deaths.

In Nebraska the heart disease toll in 1953 was 52.9 per cent of all deaths, a total of 7,031. An estimated 80,000 Nebraskans have some form of heart trouble.
