Dial Long Distance Coming in Nebraska Says Telephone Co.

Dialing of long distance calls from subscriber's telephones will come to Nebraska early in 1957 at Beatrice when a new dial system is placed in operation there.

This was announced August 11 by Merle M. Hild, vice president of The Lincoln Telephone and Telegraph Company, at a ground breaking ceremony for the company's new telephone building at Beatrice.

Initially, Beatrice subscribers will dial direct to about 250,000

telephones in the state. As the national direct distance dialing program develops, subscribers there will be able to dial direct from their telephones to several million telephones in the United States and Canada. Later on, direct distance dialing will also be installed in other company exchanges.

Hale pointed out that operators will continue to handle long distance calls placed from coin telephones, as well as those placed "person-to-person" and "collect." In other words, only "station-to-station" calls can be dialed by customers. Calls will be recorded and timed automatically.

Contracts for the new building will be let August 19 and construction will start immediately thereafter, according to Hale. The building will be completed April 1, 1956, and installation of equipment will then begin at once.
