SOMEDAY YOU MAY "SUNBURN" THE MEAL—Actress Eleanor Bender believes in making hay while the sun shines—she profits from a newly developed aluminum solar cooker which will do this roast to a turn while she's sunbathing in Hollywood, Calif. Sheets on top focus sun's rays on a heat-collecting panel which raises oven temperature sufficiently to roast meat or bake a cake. Hundreds of scientists recently attended symposiums at Phoenix and Tucson, Ariz., to discuss harnessing of the sun's energy to perform mankind's chores. Scientists caution that solar energy harnessed for power-producing purposes will only supplement, not replace, more conventional power sources.
